

SAM Pre-Solicitation Notice

Header Information

Title: Vandenberg Space Force Base Campus Consolidation Electrical Infrastructure Project

Federal Organization: 97CR National Reconnaissance Office

General Information

Response Date:

Classification

Set Aside: N/A

Product Service Code: Y1BG/Y1JZ

NAICS Code: 236220

Place Of Performance Location: USA, Northern California

Description

The NRO Facilities at Vandenberg Space Force Base (VSFB) are currently spread throughout the base at various locations. Previous master planning efforts have identified a “campus” area in and around an existing cluster of existing NRO facilities (an area roughly bounded by 29th Street, 35th Street, New Mexico Avenue, and California Boulevard). Final master planning efforts are currently under way to finalize the campus consolidation vision. The first step in realizing this vision is to bring reliable redundant power to this campus area at VSFB. The purpose of this effort is to provide two new, 12.47 kV electrical circuits, one from Substation B and one from Substation C to the previously identified NRO campus consolidation area. The NRO intends to release an Invitation for Bid (IFB) on the Acquisition Research Center (ARC) website in March 2025. Additional details regarding this effort will be provided at that time.

Interested parties will be required to have an ARC account to view the solicitation, and are encouraged to ensure they have access prior to the anticipated release date identified in this notice. If interested parties do not currently have an ARC account, the parties may quickly register for the ARC by visiting the link included with this notice on an unclassified system and clicking the "register" button found in the top right portion of the page. Please note that this IFB does not require access to the classified ARC; a secure phone and secure email address are not required. Should parties experience issues with registration, contact the ARC Helpdesk at the following number: (703) 230-6300.
