

Single Source Justification (Simplified Acquisition)

Section A: General Contract Information

Is this a Bridge Action as defined in the [AF Bridge Action Reduction Plan](#)? ☐ Yes ☒ No

Contracting Activity: 96 MDG

Project/Program Name: Dining Facility Maintenance - Hobart Full-service contract

Purchase Request / Local ID Number: [REDACTED]

Estimated Contract Cost (including Options): [REDACTED]

Section B: Description of the Supplies/Services Required

The 96th Medical Group (96 MDG) requires quarterly preventative maintenance inspections on the equipment listing that accompanies the PWS as well as acute on call repair services (to include parts and labor) on its kitchen equipment located within the Dining Facility.

Section C: Justification for Soliciting from a Single Source or Brand Name

Nutritional Medicine requires a "full service" preventative maintenance contract with quarterly maintenance and acute remedial equipment repair to include parts and labor in the contract price. Current contractor, Hobart/ITW, is able to provide the "full service" needs of the Nutritional Medicine Facility (NMF) in order to cut the equipment down time. In the past, NMF would have to call a company (Hobart, General Parts, REMCO, etc), and someone would have to come out to look at the equipment to determine the issue. They then would provide Nutritional Medicine with a quote and then Nutritional Medicine would submit a work service request to be sent to logistics. Once the service request is approved, then they can call the company and have someone order the equipment/parts and then schedule to have someone come out and repair the equipment. This requirement is needed to cut the time down for equipment repair which can stretch out for a month at times and to get it down to a few days.

Section D: Efforts to Obtain Competition

Three vendors were contacted (REMCO, General Parts, and Hobart Service) and provided with the performance requirements that were needed for the dining maintenance contract. Two of the vendors were not able to provide the services needed at the specifications laid out by Nutritional Medicine that includes both quarterly maintenance and remedial repair with parts/labor included. As part of our market research, we posted a NOCA on SAM.gov, that was posted on the open market for 10 days. We announced that we planned to award this contract to Hobart Service as a sole source and requested for any interested parties to let us know that they could provide this requirement. A response was received from one company, Refrigeration Rescue LLC, but they were not able to fulfill the full requirements of the award and only was interested in the quarterly maintenance portion. Based on our review of the market and the NOCA, this will be awarded as a sole source to Hobart Service which is registered as a large business under the NAICS code 722310. These items cannot be purchased through ECAT, Prime vendor, or GSA.

Section E: Steps to Preclude Future Single Source or Brand Name Awards

It is never the intent of our organization to preclude competition for companies that can meet our requirements. We regularly provide our requirements to multiple vendors/manufacturers to drive competition

Single Source Justification (Simplified Acquisition)

and competitive pricing for the Government. The 96 MDG will continue to survey the market for similar products and brands to Hobart Services that meet the minimum requirements.

Section F: Contracting Officer's Determination

I have determined, in accordance with [FAR 13.106-1\(b\)\(1\)](#), that the circumstances of this contract action deem only a single source is reasonably available.
