

Purchase Description

HDPE Type Suction Hose and Discharge Hose with Connections for Self-Powered Flood Mitigation Pumps

The manufacturer shall provide rental stock delivered and installed by Monday 7APR2025 2000 CST and installed on existing 18-in pumps with discharge hose.

Use: Provide suction for 3x18" self-priming diesel pumps with flanged connections from a pump station ponding area with 530 ft elevation to an area with the pump at an elevation of 544 ft. The area includes obstacles that will have to be avoided such as fuel tanks and relief well access manholes. There are several grade changes. HDPE will be field welded. All pipe/connections should be able to handle a full vacuum.
