

		DEFINITION
PROBLEM YOU SOLVE	weight 10%	Deliver a clear and concise description of the problem you are attempting to address with your technology or service.
SOLUTION	SOLUTION DESCRIPTION	Fully describe what you are offering in your solution and describe the scientific basis for the solution and how it solves the problem statement identified.
	ALIGNMENT WITH STRATEGIC FOCUS AREA	How well does your Solution map to our published Strategic Focus Area? Argue the problem you've chosen is a perfect fit with the problems for this program.
	SCIENTIFIC FEASIBILITY	Is the science behind the innovation sound? Why should a skeptic believe that your approach is built upon a firm scientific foundation?
	weight 35%	ENABLING TECHNOLOGIES
		Do the required enabling technologies introduce added risk? Using proven underlying technologies and techniques helps to lower technical risk.
DOD IMPACT	OPERATIONAL IMPACT	Looking only at the DoD personnel who will be impacted by your solution, argue that their mission or effectiveness will be significantly improved if your solution is adopted. What is the impact of your solution vs. today's solution in the context of a single individual's work role and responsibilities?
	weight 15%	POTENTIAL SCALE OF IMPACT
		Look into the future to a time when your solution is both technically mature and fully "transitioned" (actively in use by DoD.) Describe the scale of your impact within the context of the DoD.
DIFFERENTIATION	DIFFERENTIATION	In what ways does your proposed solution introduce innovations that significantly enhance the DoD's capabilities? (Innovation is as defined in DFARS 212.7001)
	weight 25%	ALTERNATIVE TECHNICAL APPROACHES
		Why is your approach is the best from a technical perspective? If you can convincingly refute alternative means to solving this problem, please briefly do so.
PRICING MODEL	BUSINESS MODEL DEFINITION	Describe how you will make money from your solution. Although we are NOT asking you to provide specifics on prices, we need to understand how you plan to capture revenue moving forward. For example, are you selling software licenses, tokens for compute services, engineering services, training and support, something else? Tell us about your revenue model.
	weight 10%	BUSINESS MODEL VALIDATION
		Make the case that your business model is working or will work for your business. To what evidence can you point that your strategy to monetize your solution is viable with commercial and/or Government buyers.
PITCH QUALITY	PITCH QUALITY	We don't care about video production quality. We care about your ability to communicate about your innovation and the impact you believe it will have. (Amateur videos shot on your smart phone are fine. Do make sure the audio is clear and easily understood. Practice and/or multiple takes are recommended.)
	weight 5%	DATA QUALITY & ATTRIBUTION
		Support your arguments with relevant, properly attributed data to enhance your credibility.

Platform One Solutions Marketplace v1-0 Evaluation Criteria

		UNSATISFACTORY	MARGINAL	SATISFACTORY	SUPERIOR
PROBLEM YOU SOLVE <i>weight 10%</i>		Undefined problem scope.	Somewhat defined problem scope.	Adequately defined problem scope.	Very well defined problem scope.
SOLUTION	SOLUTION DESCRIPTION	Fails to describe product and beneficial features.	Partly describes product and beneficial features.	Adequately describes product and beneficial features.	Clearly and concisely describes product and beneficial features.
	ALIGNMENT WITH STRATEGIC FOCUS AREA	Not aligned with the Strategic Focus Area.	Somewhat aligned with the Strategic Focus Area.	Aligned with the Strategic Focus Area.	Perfectly aligned with the Strategic Focus Area.
	SCIENTIFIC FEASIBILITY	No scientific basis for presented approach.	Incomplete scientific basis for presented approach.	Credible scientific basis for presented approach.	Convincing scientific basis for presented approach.
	ENABLING TECHNOLOGIES	Requires nonexistent or unavailable technology.	Requires emerging, cutting edge technology.	Requires proven technologies.	Requires DoD-fielded technologies.
<i>weight 35%</i>					
DOD IMPACT	OPERATIONAL IMPACT	If successful, no improvement vs. existing technological approaches.	If successful, slight improvement vs. existing technological approaches.	If successful, significant improvement vs. existing technological approaches.	If successful, radical improvement vs. existing technological approaches.
	POTENTIAL SCALE OF IMPACT	A fully deployed, mature solution could impact only niche use cases.	A fully deployed, mature solution could impact an DoD element.	A fully deployed, mature solution could impact several DoD elements.	A fully deployed, mature solution could have impact across the entire DoD.
<i>weight 15%</i>					
DIFFERENTIATION	DIFFERENTIATION	Does not demonstrate a new technology, process, or method; or a new application of an existing technology, process, or method.	Marginally demonstrates a new technology, process, or method; or a new application of an existing technology, process, or method.	Adequately demonstrates a new technology, process, or method; or a new application of an existing technology, process, or method.	Convincingly demonstrates a new technology, process, or method; or a new application of an existing technology, process, or method.
	ALTERNATIVE TECHNICAL APPROACHES	No examination of alternatives.	Partially refutes alternatives.	Adequately refutes alternatives.	Persuasively refutes alternatives.
<i>weight 25%</i>					
PRICING MODEL	BUSINESS MODEL DEFINITION	Poorly defined (or undefined) revenue model.	Moderately defined revenue model.	Well defined revenue model.	Expertly defined revenue model.
	BUSINESS MODEL VALIDATION	Fails to demonstrate business model is valid.	Draws credible parallels to others' proven models.	Evidence of interested customers utilizing the above-defined model.	Evidence of paying customers utilizing the above-defined model.
<i>weight 10%</i>					
PITCH QUALITY	PITCH QUALITY	Poorly presented. Very difficult to impossible to follow.	Moderately presented. Sometimes difficult to follow.	Effectively presented. Convincing, easy to follow.	Clearly and persuasively presented. Compelling arguments.
	DATA QUALITY & ATTRIBUTION	Poorly supported by data. Little to no data attribution.	Partially supported by data. Some data attribution.	Credibly supported by data. Adequate data attribution.	Persuasively supported by meaningful data. Comprehensive data attribution.
<i>weight 5%</i>
