The Contractor agrees to provide unlimited labor (emergency visits), parts, shipping, and telephone support. Software and software upgrades are not covered under the Service Agreement. A minimum of one preventative maintenance visit shall be performed within the contract period.

Modifications, repairs, and/or adjustments shall be made to correct deviations from the manufacturer's stated performance when necessary due to normal usage in accordance with the manufacturer's instructions. The Contractor shall exchange or modify components when in the best interest of the Government and approved by the Contracting Officer or Contracting Officer's Technical Representative (COTR).

In addition to the regularly scheduled maintenance visit, the Contractor shall provide unlimited emergency service visits and unlimited technical phone support at no additional cost during regular business hours (8:00am - 5:00 pm). In the case of breakdowns making the instruments inoperable, the Contractor shall respond within 48 hours during normal business hours after the request for service from the Contracting Officer or Contracting Officer's Technical Representative (COTR).

The Government may conduct basic maintenance. Also, the Government may choose to attempt simple adjustments or repairs under telephone direction by the Contractor when it is in the Government's best interest to quickly correct problems; however successful repairs remain the Contractor's final responsibility.

All services shall be performed by factory-trained service engineers.

Service shall include, labor, travel, living expenses, shipping costs, and replacement of all defective components with exception of those listed below.

All third-party items not specifically identified above, consumables, computers and peripherals, and X-ray tubes need not be covered by the service contract.
