

MEMORANDUM FOR Chief, Contracting Division

SUBJECT: Sources Sought Notice for Sole Source Market Research for the St Albans Columbarium

1. The New York District plans to solicit and award a modification to the existing construction project to correct the following issue.
2. This notification serves three (3) purposes:
 - A. To notify potential offerors of the Government's intent to solicit brand name only components for this project as per FAR 6.302-1(c).
 - B. To identify potential sources that can provide an exact match to the brand name only item(s).
 - C. Notification of the Army's intent to solicit brand name components as described below.

This is a Sources Sought Notice (SSN) issued for market research purposes only. This is NOT a Request for Proposal (RFP) or a guarantee of a future solicitation. Seeking information from industry to identify potential sources capable of providing a proprietary Reduced Pressure Zone Assembly (RPZA) and Double Check Detector Assembly (DCDA) - 3" Watts LF909 and 6" Watts 757DCDA respectively. The specificity of the manufacturer and model is a requirement by the municipality (NYCDEP) and needed to be included in the application prior to approval. Any substitute of these devices specified will result in a resubmission to the municipality by the DOR. If the above listed item is not approved for use, the project will not be able to continue and the water supply from the municipality will not be turned on and/or allowed to be accessed. This will result in complete stand still of the project until it is rectified and will cause substantial delay costs to the Government.

10 USC 2304(c)(1), as implemented by FAR 6.302-1, Only one responsible source (or limited number)

3. For more detailed information pertaining to this matter please refer to the project COR, Robert M. Hanna, P.E., Robert.M.Hanna@usace.army.mil or the PM, Lucia Gamba, Lucia.M.Gamba@usace.army.mil.
