

Industry Day Notification

Scope:

NOTICE: This notice is for all remaining Navajo-Gallup Water Supply Project (NGWSP) construction projects planned through the completion of the project in 2030. This is not a solicitation but rather an Industry Day Notification to determine potential sources for information and planning purposes only.

A separate Small Business Sources Sought will most likely be posted in mid-February 2025 for an upcoming requirement, NGWSP Pumping Plant 1 (PP1) to determine any potential small business sources for that requirement only. If you are a small business and interested in that work, please respond to that Small Business Sources Sought also.

The purpose of this Industry Day Notice and the Industry Day itself is to conduct market research to determine if responsible sources exist, to assist in determining if the remaining NGWSP efforts can be competitive.

The proposed North American Industry Classification Systems (NAICS) Code is 237110 (Water and Sewer Line and Related Structures Construction) which has a corresponding Size standard of \$45.0M annual average revenue. The Government will use this information to determine the best acquisition strategy for each remaining procurement.

Projected Requirement Details:

The NGWSP, whose overarching mission is to convey a reliable municipal and industrial water supply from the San Juan River to the eastern section of the Navajo Nation, southwestern portion of the Jicarilla Apache Nation, and the city of Gallup, New Mexico via about 300 miles of pipeline, 19 pumping plants, and two water treatment plants. Reclamation seeks to further its mission for the NGWSP through several FAR 15/36 competitive procurements. The remaining construction requirements for NGWSP are as follows:

- *Pumping Plant 1 (PP1)
- *DZ Booster/Pumping Plant/Site 3 Tank
- *San Juan Lateral (SJL) Intake & River Pumping Plant - Reach 1
- *Block 2-3 Horizontal Directional Drilling (HDD)
- *Reach 1 Bypass Tank
- *Turnout Buildings
- *Block 2-3 Pipeline
- *FCW Reservoir & Dam
- *Shiprock Connection
- *Reach 14.6a, 14.7a, 14.8a Pipeline

More information on each requirement will be provided at the Industry Day.

Strategy Overview/Schedule of Projected Events:

The purpose of this Industry Day Notice and the Industry Day held in Farmington, NM on April 2, 2025, is to gather industry information from interested parties, which is deemed essential as part of Reclamation's collaborative planning process for the procurement of the remaining NGWSP procurements.

Industry Day Details:

- Reclamation announces an Industry Day for any entity or entities interested in the remaining NGWSP construction requirements. Industry Day will be held at the San Juan College School of Energy, Marion Room, 5301 College Blvd, Farmington, NM – April 2, 2025.

- o See attached Google maps for San Juan College location and directions from each the Durango, CO airport and Albuquerque, NM airport.
