

## Single Source Justification (Simplified Acquisition)

### Section A: General Contract Information

Is this a Bridge Action as defined in the [AF Bridge Action Reduction Plan](#)?

☐ Yes

☒ No

Contracting Activity: AFRL/PZLET

Project/Program Name: SAS Software Maintenance and New Licenses

Purchase Request / Local ID Number:

Estimated Contract Cost (including Options):

### Section B: Description of the Supplies/Services Required

Reference: FAR 6.302-1, FAR 13.106-1(b), AFI 48-105.

The United States School of Aerospace Medicine, Public Health Department, Epidemiology Consult Service Division (USAFSAM/PHR) currently has a brand name requirement to purchase SAS software maintenance licenses. Epidemiology and Statistics software applications are operational requirements for PHR. The software is required to conduct surveillance, public health research and analysis. Additionally, Data management applications are required to work with large data sets shared with base level PH. The software can mine, alter, manage and retrieve data from a variety of sources and perform statistical analysis on it.

Contract Type: new firm-fixed price (FFP) contract.

GWAC: GSA IDQ 47QTCA18D0081

### Section C: Justification for Soliciting from a Single Source or Brand Name

This is an acquisition for brand name software of SAS® ESD Software. The United States School of Aerospace Medicine, Public Health Department, Epidemiology Consult Service Division (USAFSAM/PHR) currently has a requirement to purchase SAS software maintenance licenses.

License Maintenance Period: 01 May 2025 to 30 April 2026.

Award to an other-than-requested (OTR) brand name would result in an unacceptable delay in fulfilling USAFSAM/PHR requirements leading to mission stoppage and significant coverage gaps with conversion of all existing processes to conform to new software could take up to a year to accomplish. This is unacceptable due to all staff being trained on SAS. 40 staff members would need to be re-trained/need additional training to use software other than SAS. This would take up to a year for our staff to learn a new program and re-establish codes. While learning a program other than SAS, we would not be able to work on as many consults as staff would be hindered by learning a new program. PHR would not be able to analyze data quickly (we receive congressional inquiries that require a 48 hour turn around). With that being said, our PWS and job descriptions for our federal employees state that they are trained to use SAS. We make it mandatory that members know SAS before we hire them.

Since USAFSAM/PHR already uses the SAS Software, there is a need to obtain the maintenance licenses for continued mission success. SAS Software is required to perform the duties per AFI 48-105 (1.6.3.) - Manage, monitor and analyze surveillance data and other AF-specific data for disease trends and reports significant events to appropriate AF and DoD authorities. If SAS is not purchased before expiration date, USAFSAM/PHR, Operational Support Team, and the Global DoD Respiratory Surveillance Program will experience work stoppage.

As Executive Information Systems, LLC is the sole provider of SAS software renewal maintenance, it is the only firm capable of providing the supplies described above without the U.S. Air Force experiencing substantial duplication of cost that is not expected to be recovered through competition.

## Single Source Justification (Simplified Acquisition)

Accordingly, SAS®ESD Software is the only known brand capable of providing the services described above without the Government experiencing unacceptable delays.

### Section D: Efforts to Obtain Competition

USAFSAM/PHR conducted market research through GSA Advantage as noted in previous section in order to identify other products that would meet the Government's needs. No equivalent products were discovered. Additional market research was done by USAFSAM/PHR by phone and email direct to the contractor to confirm that the proposed sole source, SAS® ESD Software through Executive Information Systems, LLC, is the only known source able to satisfy the Government's requirement. SAS® ESD Software is available through select third party resellers; **however, that is for first year license rights only**, renewals for such licenses are available only through Executive Information Systems, LLC.

Executive Information Systems, LLC  
6901 Rockledge Drive, Suite 600  
Bethesda, MD 20827-0076

### Section E: Steps to Preclude Future Single Source or Brand Name Awards

USAFSAM/PHR will continue to monitor the market to determine if other products meet the Government's needs. The Government will continue to conduct market research using catalogs, Internet, attendance at technical trades shows, and other industry events to locate other solutions to meet the Government's requirements. As USAFSAM/PHR identifies new requirements, USAFSAM/PHR will make every effort to ensure future actions will be competed under full and open competition. USAFSAM/PHR has determined, in accordance with FAR 13.106-1 (b)(1), that the circumstances of this contract action deem only a single source is reasonably available.

### Section F: Contracting Officer's Determination

I have determined, in accordance with [FAR 13.106-1\(b\)\(1\)](#), that the circumstances of this contract action deem only a single source is reasonably available.

| Date        | Typed Name and Rank/Grade of Contracting Officer | Signature of Contracting Officer |
|-------------|--------------------------------------------------|----------------------------------|
| 25-Mar-2025 | Kerisha R. Wordlaw                               |                                  |
