1. Description:

The Space Development Agency (SDA) anticipates soliciting proposals from industry for the Proliferated Warfighter Space Architecture (PWSA) Tranche 3 Tracking (T3TRK). The Tranche 3 Tracking (T3TRK) Layer will expand upon the T2 and T1 Tracking Layer capabilities with targeted technology enhancements, expanded coverage, increased integration, established calibration processes, and greater production efficiencies. Each Tracking Layer space vehicle (SV) and communications systems will be interoperable with all PWSA SVs (i.e., Transport Layer SVs) and will operate in an integrated fashion through a common ground system. Thus, the T3TRK Layer will support the challenge of providing that low-latency data to in-theater weapon systems to ensure kill chain closure against stressing adversary weapon systems.
