

STATEMENT OF WORK
Command Statistical
Software

1.0 BACKGROUND

NMRC needs a statistical program that is easy to use and takes raw data to a graph ready for presentations, posters or publications.

2.0 SCOPE

Requirements are as follows:

- The software should be usable by technicians as well as principal investigators without the need for lengthy training. It should be highly compatible with other programs so research sharing is effortless between collaborators.
- The software should be approved for use within NMRC and deployable silently via enterprise management software.
- It should permit at least 125 simultaneous users, and user/computer licenses should be modifiable and revocable from a centralized support system. This purchase will cover 1 year of use under these terms.
- Technical support from vendor and access to patches

3.0 DELIVERABLES

125 seat Graphpad License for latest available version

4.0 SECURITY

This effort is unclassified.

5.0 PERIOD OF PERFORMANCE

Support and services – 12 months upon award

6.0 TECHNICAL POINT OF CONTACT

Peter Seabrook 301-319-3035 peter.e.seabrook.civ@health.mil
