

Purchase Description
Procurement of Resistance Upgrade from Standard Resistors to Primary Standard Resistors

The U.S. Army TMDE Activity (USATA) has a requirement to implement a brand name purchase of thirteen (13) Primary Resistance Standards used to perform and upgrade the current standard resistance standard. The Primary Resistance Standards shall be delivered to USATA's Army Physical Standards Labs located at Building 5435, Fowler Road Redstone Arsenal. The Primary Resistance Standards to support USATA's mission as follow:

1.0 Requirements:

<u>Model</u>	<u>Description</u>	<u>Quantity</u>
MI 9331/0R001	0.001 Ohm primary resistance standard.	1
MI 9331/0R01	0.01 Ohm primary resistance standard.	1
MI 9331/0R1	0.1 Ohm primary resistance standard.	1
MI 9331/1	1 Ohm primary resistance standard.	1
MI 9331/10	10 Ohm primary resistance standard.	1
MI 9331/100	100 Ohm primary resistance standard.	1
MI 9331/1K	1K ohm primary resistance standard.	1
MI 9331/10K	10K ohm primary resistance standard.	1
MI 9331/100K	100K ohm primary resistance standard.	1
MI 9331/1M	1M ohm primary resistance standard.	1
MI 9331/10M	10M ohm primary resistance standard.	1
MI 9331G/100M	100M ohm Air resistance standard.	1
MI 9331G/1G	1G Ohm Air resistance standard.	1
17025 Accredited Calibration of 9331 and 9331G Resistors		11

2.0 Delivery Requirements
