

Statement of Work for PLC Equipment Modicon M580 PLC Equipment

The PLC equipment purchased will be used to replace our existing outdated Quantum Model PLCs. The equipment will be purchased through Crescent Electric and includes ethernet backplanes, analog, digital, relay, and thermocouple modules. Each of these modules require a compatible wiring attachment to secure the wires to, which are also included in the quote. Once procured our Electronic Techs will work to replace our existing racks as the facility has time. The new equipment will allow facility upgrades to be accomplished.
