**Department of the Army
Limited Source Justification for Brand Name Order under
General Services Administration (GSA)
Multiple Award Schedules**

1. Contracting Activity: U.S. Army Contracting Command – Rock Island (ACC-RI), Rock Island Arsenal, Rock Island, IL 61299-8000.

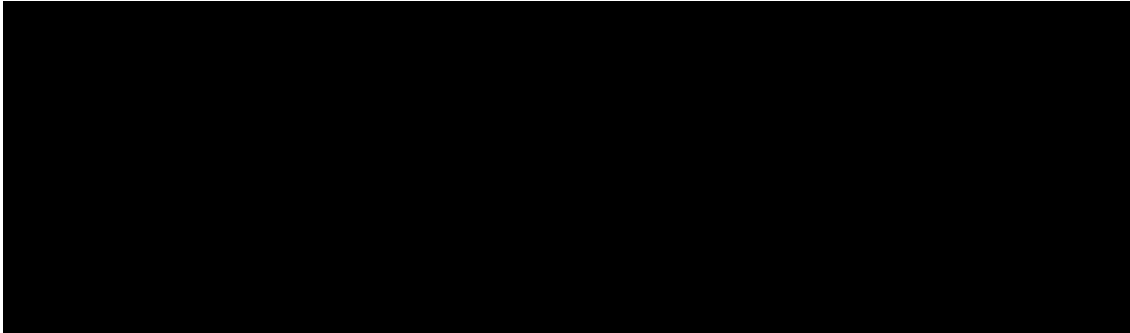

2. Description of Action: The Office of the Chief Information Officer (OCIO) requests a firm-fixed-price delivery order with Gartner, Inc. ACC-RI is conducting this acquisition under the authority of the Multiple Award Schedules Program. ACC-RI will execute the action under the Department of Defense Enterprise Software Initiative (DoD ESI) for Research and Advisory Services, Blanket Purchase Agreement (BPA) # N66001-19-A-0049, established against General Services Administration Federal Supply Services Information Technology (IT) Schedule 70 contract number 47QTC A18D008L. ACC-RI projects award for [REDACTED] and will use fiscal year [REDACTED] Operations and Maintenance funds. An acquisition plan is not required because this procurement does not meet the threshold at Defense Federal Acquisition Regulation Supplement 207.103(d)(i)(B).

3. Description of Services: The requirement for Gartner Information Technology (IT) Research and Advisory Subscription Licenses is to provide senior IT executives with insight, advice and actionable recommendations that maximize the mission impact of IT services. Gartner is a technological research and consulting firm that offers subscriptions that provide unbiased, objective research, advisory, and executive support services to implement the newest ideas, best practices, and innovation in IT. [REDACTED]

[REDACTED] The proposed action will not include an option provision. The OCIO estimates a total dollar value of [REDACTED], based on the Independent Government Estimate (IGE). The chart below lists the specific services, quantities and estimated prices per the IGE.

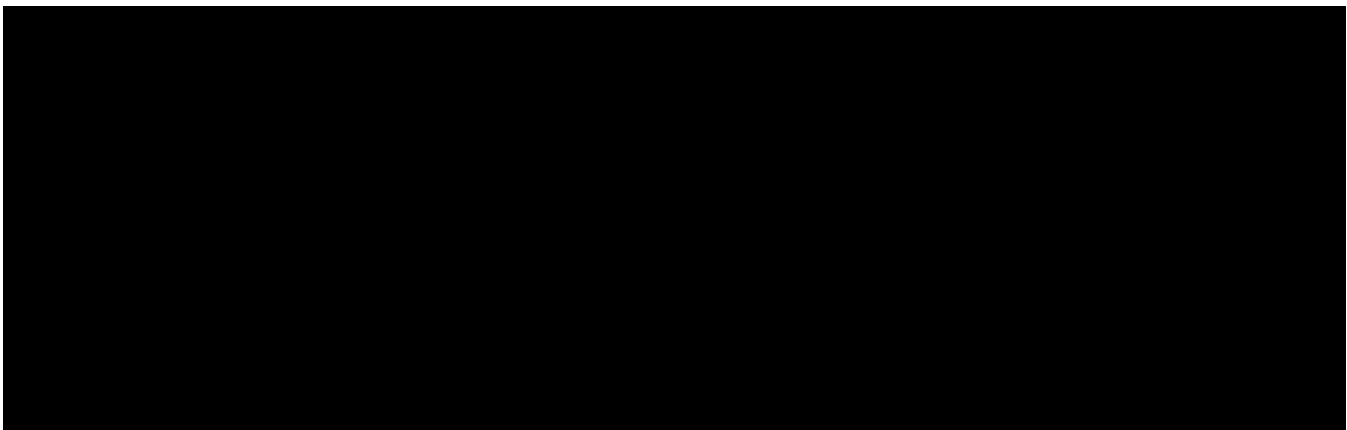

Contractor: Gartner, Inc.
Supply/Service: Gartner Information Technology
Research & Advisory Subscription Licenses
Est Dollar Value: 

4. Authority Cited: Federal Acquisition Regulation (FAR) 8.405-6(a)(1)(i)(B) and FAR 8.405-6(b)(1). The supplies or services to be ordered are unique or highly specialized by brand name. Only one source is capable of providing the supplies or services required at the level of quality required because the supplies or services are unique or highly specialized.

5. Reason for Authority Cited: After thorough research, the OCIO determined Gartner was the only IT Research and Advisory Service provider of the  identified that is capable of delivering the volume, quality of insight, and expertise that leadership requires to stay abreast of new and emerging technologies and trends and continuously upskill its workforce with access to best practice research. Gartner's research is proprietary and is only available through its company, as it has no resellers.

The OCIO leads the way in executing the Army's Chief Information Security Officer (CISO) duties per AR 25-2, and Army Senior Information Security Officer's duties per the Federal Information Security Modernization Act (FISMA), across the entire cybersecurity spectrum. To exercise this obligation and authority, the OCIO must maintain an accurate and complete awareness of operational and management best practices and new technologies being used in the commercial marketplace, as well at the Federal Government. The OCIO requires access to IT Research and Advisory Services to inform key decisions in planning and delivering IT services. The research and advice must be relevant to the requirements in support of strategic planning, cost reduction, and understanding and optimizing software license pricing models.

Contractor: Gartner, Inc.
Supply/Service: Gartner Information Technology
Research & Advisory Subscription Licenses
Est Dollar Value: [REDACTED]

[REDACTED]

The OCIO identified [REDACTED] other potential vender [REDACTED] through DoD ESI, but it was considered unacceptable for several reasons.

[REDACTED]

Overall, Gartner provides a greater array and depth of information on IT disciplines than any other available product, and it provides content that is tailored to the public sector and specifically addresses the OCIO IT concerns.

6. Market Research: Market Research was conducted 1-10 October 2024. Techniques used to complete market research included background knowledge, desktop research, business analysis, and cost. In accordance with (IAW) Army Federal Acquisition Regulation Supplement 5139.101-90(a)(1), it is mandatory for the Government to utilize DoD ESI agreements for commercial IT hardware and software purchases. [REDACTED]

[REDACTED]

7. Actions to Increase Competition: On-going market research will continue to find additional companies that possess the unique capabilities to meet future IT research and advisory requirements. There are many research and advisory companies listed on GSA IT Schedule 70 and the ESI BPA, each offering well defined products and services with pre-negotiated prices. However, until such time that other companies significantly upgrade these offerings and offer a Top-Secret Facility Clearance, Gartner will remain the only source capable of providing the supplies or services required at the level of quality required.
