

STATEMENT OF WORK

Oxford Instruments Maintenance and Support

PR: _____

Background

The Goddard Space Flight Center owns and operates two Oxford Instruments processing systems. These systems are used in the fabrication of silicon devices processed in the Code 553 Detector Development Laboratory. These systems require maintenance and replacement of critical parts on a regular basis in order to maintain reliable operation and minimize unplanned breakdowns.

Scope

1. The vendor shall provide parts and labor for the preventative maintenance of the Oxford PlasmaPro 100 Estrelas, and the PlasmaPro 100 Cobra.

Requirements

2. Comprehensive Support Agreement, including parts and labor, and one annual Preventive Maintenance service for the PlasmaPro 100 Estrelas, Serial number 220276, through 2/1/2026. Including:
 - Telephone support, access to the Call Center, Call logging, and Technical support.
 - Labor. In the event of a system failure a qualified field service engineer with visit to GSFC within five business days.
 - Parts. Parts originally supplied by Oxford instruments will be covered for replacement, shipping charges included, excluding rotary pumps, consumables and spares.
 - Annual Preventive Maintenance by a qualified field service engineer, including a Performance Maintenance Kit.
3. Self Sufficiency Support Package for PlasmaPro 100 Cobra, Serial Number 220278 through 2/1/2026 Including:
 - Preventive Maintenance. One annual standard PM including PM parts.
 - Technical support, telephone help desk, response with 24 hours.
 - Remote support via TeamViewer.

Delivery Schedule

After Receipt of Order (ARO) through 2/1/2026.

Place of Performance

- NASA Goddard Space Flight Center, Code 553, Building 30, Room 200, Greenbelt, Maryland 21029
- POC: (Estrelas) Christine Jhabvala, B11, Rm E039, (301)286-8694
- POC: (Cobra) Edward Wassell, B11, Rm E019, (301)286-5755
- Alternate POC: Timothy Miller, B11, Rm E013, (301)286-4305

Period of Performance

- Through 2/1/2026
