

Justification for an Exception to Fair Opportunity or to Use Brand-Name Restriction

Is this a brand-name justification? ☐ Yes ☒ No

Is this a Bridge Action as defined in the AF Bridge Action Reduction Plan? ☒ Yes ☐ No

Contracting Activity: Air Force District of Washington (AFDW/PK), 1500 W. Perimeter Rd., Ste 5750, JBA, MD 20762

Purchase Request / Local ID Number: N/A

Program Name (and Program Element, if applicable): Financial Improvement & Audit Readiness (FIAR) Task Order 44

Estimated Cost/Price of the Order (including options): [REDACTED]

Type Program (see DAFFARS 5302.101 for definitions): ☐ PEO Program ☐ Operational ☒ Enterprise

Type of Determination: ☒ Individual ☐ Class Expires: [click and select]

Fair Opportunity Exception: FAR 16.505(b)(2)(i) (Check the applicable subparagraph below.)

☐ (A) ☒ (B) ☐ (C) ☐ (D) ☐ (E) ☐ (F) ☐ (G) Check this box to display the FAR 6.302 exceptions.

(1) Contracting Activity:

Air Force District of Washington/Contracting Directorate (AFDW/PKS), 1500 West Perimeter Road, Ste 5750 Joint Base Andrews, MD 20762

(2) Nature and/or description of the action being approved:

This action is a modification to FA701418D5000 task order FA701422F0111 for Financial Improvement & Audit Readiness (FIAR) Task Order (TO) 0044 awarded to Deloitte & Touche LLP on 6 May 2022, to extend the period of performance by 1 month in accordance with the Federal Acquisition Regulation (FAR) 52.217-8. This modification will permit the continuation of mission critical FIAR services on FIAR enterprise information technology (IT) and security controls work to downgrade material weaknesses (MW) identified by the DoD Inspector General (IG) independent public accountant (IPA) from 2018-2024 for ineffective security controls (segregation of duties (SoD), access controls (AC), security management (SM), interface controls (IC), and configuration management (CM) in Department of Air Force (DAF) Financial Information Systems for the General Fund (GF) and Working Capital Fund (WCF) by December 2026. The contract type is a Firm Fixed Price (FFP)

(3) Description of the supplies/services required to meet the agency's needs:

The Office of the Assistant Secretary of the Air Force for Financial Management and Comptroller (SAF/FM) oversees and manages the annual financial statement audit process. The SAF/FM Deputy Assistant Secretary Business Systems and Technology/Chief Information Officer (SAF/FMI) requires support to continue development and deployment of highly specialized and complex cybersecurity solutions for Department of Air Force (DAF) financial and financial feeder systems across five key capabilities: Identity, Credential, and Access Management (ICAM), Security Information and Event Management (SIEM), System Security (SS), Configuration Management Database (CMDB), and Enterprise Integration (EI).

SAF/FMI requires uninterrupted, highly specialized services:

Information Technology (IT) Audit Liaison Support. Providing audit liaison support to remediate material weaknesses in financial information systems by facilitating walkthroughs of audit processes and assisting with the exchange of audit information, audit samples, and supporting documentation in response to auditor requests.

IT Assessable Unit Corrective Actions and Integrated Master Schedules (IMS). Provide beginning- to-end Corrective

Justification for an Exception to Fair Opportunity or to Use Brand-Name Restriction

Action and IMS support for the information technology assessable unit portion of the DAF's financial statement audit. SAF/FMI works with DAF stakeholders to improve the information technology Corrective Action Plan (CAP)/Notice of Finding and Recommendations (NFR) process to gain efficiencies.

Financial Improvement Audit Remediation (FIAR) Information Technology (IT) Systems/Integration. Provide support in assessing, documenting, testing, and monitoring internal IT controls for financial systems in auditing to downgrade material weaknesses.

Identity, Credential & Access Management (ICAM). Provide ICAM solutions to secure and assure access to DAF financial information systems and manage digital identities, credentials, and access to systems and data. SAF/FMI plans to achieve this by implementing a suite of ICAM solutions across Identity Provider (IdP), Identity, Governance, and Administration (IGA), and Privileged Access Management (PAM) and onboarding all 69 financial and financial feeder systems to these solutions. ICAM deliverables include onboarding and technical integration, operational support, environment support, and migration support for financial systems to the DAF enterprise ICAM. SAF/FMI has 36 financial information systems remaining to onboard to the Identity Provider (IdP) solution, 36 systems remaining to onboard to Identity Governance and Administration (IGA), and 46 systems remaining to onboard to Privileged Access Management (PAM) to meet the DAF audit roadmap requirements for financial information systems.

Security Information & Event Management (SIEM). Provide real-time monitoring and analysis of security-related events and data to detect and respond to security incidents more quickly, reducing cyber-attacks' impact on DAF financial systems and improving overall security posture. This effort requires continued integrating financial and financial feeder systems with multiple Cybersecurity Service Providers (CSSPs) and providing operational support for all system owners. SIEM activities include onboarding, technical integration, and operational support. The DAF currently has 60 remaining systems to onboard to the DAF's security logging and SIEM solution to meet the DAF audit roadmap requirements for Financial Information Systems.

System Security (SS). Assist SAF/FMI in securing DAF financial information systems by configuring and maintaining systems securely, reducing the risk of cyber-attacks. SAF/FMI plans to achieve complex system security integration through a federated approach to integrate and interface with multiple Cybersecurity Service Providers and other cybersecurity organizations. System security deliverables include conducting system security assessments, onboarding, technical integration, and operational support. The DAF currently has 39 systems to assess and remediate control deficiencies to meet the DAF audit roadmap requirements for Financial Information Systems.

Configuration Management Database (CMDB)/Enterprise Integration (EI). Assist SAF/FMI in providing a CMDB solution and support for a centralized repository of information related to hardware, software, systems, and services to help improve the visibility of IT infrastructure to manage and maintain the change management process for the CMDB, including procedures for requesting, approving, and implementing changes. CMDB deliverables include onboarding and technical integration, organizational change management, and operational support. Enterprise integration supports other systems and applications, including directory services, authentication protocols, and authorization frameworks, to meet the DAF audit roadmap requirements for financial information systems. The DAF currently has 39 systems remaining to onboard the CMDB solution to meet the DAF audit roadmap requirements for financial information systems.

These services are performance-based and will be funded with Operations and Maintenance (O&M) 3400 appropriations. The total estimated value of this 1-month extension is [REDACTED]. The estimated value of this extension was calculated using the current FIAR Order prices. The above tasks constitute the services that will be acquired for this period of performance starting 23 March 2025 - 22 April 2025. There will be one new FFP Contract Line Items (CLINs) as follows:

CLIN Description	Quantity	Unit Price	Total Price
4001 FIAR Services	1 month	[REDACTED]	[REDACTED]

This is within the scope of the FIAR Order.

Justification for an Exception to Fair Opportunity or to Use Brand-Name Restriction

(4) Identification of the exception to fair opportunity and the supporting rationale: In accordance with FAR 16.505(b)(2)(i)(B), only one awardee is capable of providing the supplies or services required at the level at the level of quality required because the supplies or services ordered are unique or highly specialized. The tasks executed by Deloitte under the contract/task order FA701422F0111 provides for FIAR highly specialized and complex cybersecurity solutions services that directly supports the DAF in achieving FY24 National Defense Authorization Act (NDAA) mandate to achieve an unmodified audit opinion by December 2028. This Extension of Services one-month effort is required to prevent a break in critical FIAR services until award of a subsequent contract is made. Deloitte has developed and operated DAF's tools to achieve DoD and DAF's audit objectives; no other source can immediately provide or operate the highly specialized suite at the same level of quality in the needed time frame. The current vendor has developed, configured, and maintained this specialized FIAR IT technical stack, demonstrating a deep understanding of the DAF's complex architectures, security protocols, business rules, and audit requirements.
(5) Contracting Officer's determination that the anticipated cost to the Government will be fair and reasonable: The Contracting Officer will determine fair and reasonable price prior to award of this contract modification in accordance with DFARS Part 8 and FAR 15.4 Contract Pricing. Price analysis will be based on historical costs incurred, price analysis using the current contract prices, the Independent Government Cost Estimates, and technical evaluation. As this requirement meets the commercial services definition IAW FAR 2.101, certified cost and pricing data are not applicabl
(6) Other facts supporting the justification: N/A
(7) Actions the agency may take to remove or overcome any barriers to increasing fair opportunity before any subsequent acquisition for the supplies or services: Barriers are not currently being removed. Once the one-month Extension of Services period completes, SAF/FMI intends to enter into a contract with Deloitte. The sole source FIAR services will downgrade IT general controls material weaknesses in financial information systems. Following the sole source effort, the government will reassess and create an acquisition strategy for the continuation of work.
(8) Program Manager's certification that supporting data is accurate and complete: As evidenced by my signature below, I certify that any supporting data contained herein, which is my responsibility, is both accurate and complete.
(9) Contracting Officer's certification that the justification is accurate and complete: As evidenced by my signature below, I certify that the justification is accurate and complete to the best of my knowledge and belief.
(10) Approving Official's determination that one of the circumstances in FAR 16.505(b)(2)(i) applies to the order. As evidenced by my signature below, I hereby determine that the fair opportunity exception checked on page 1 applies.
