C.1 CLINS 0001, 0003 AND IF OPTION(S) ARE EXERCISED, CLINS 0101, 0103, 0201, 0203, 0205, 0301, 0303, 0401, 0403 and 0405

C.1.1 The contractor shall machine the Cast Improved Advanced Hybrid (IAH) machined Aft Outer Structure (AOS), Reference (a) item 1, provided as GFM as a raw casting, in accordance with Reference (a), as modified by the Propulsor Duct Manufacturing Plan (CDRL A001) and Attachment J-1. The IAH AOS will be casted in accordance with reference (b). The contractor shall execute all work required, including pre-HYSHMA painting, and procure all material to complete the installation of Reference (a), Items 2-6 into Reference (a), Item 1, Machined Aft Outer Structure, in accordance with reference(a) as modified by Attachment J-1. Reference (a) items 2 through 4 shall be provided as GFM. The contractor will not be responsible for reference (a) items 7-13 for this effort. Reference (a) General Note 11 does not apply to this effort. Reference (a) Fabrication Notes 213-220 do not apply to this effort. Reference (a) inspection, Tolerance and test note 304- A and E do not apply to this effort, B will be partially complete based on work completed. Reference (a) Marking note 501 does not apply to this effort. Reference (a) Preservation and Packaging Notes 602, 606, 607, and 609 do not apply to this effort.

C.1.2 The Contractor shall inspect the IAH AOS in accordance with the Inspection and Test Plan (CDRL A002) which is developed by the contractor and approved by NAVSEA, to meet all inspection points of Reference (a) Item 1 and Inspection points 1-3 only of Reference (a) and subordinate and sub-component drawings as modified by Attachment J-1, and the requirements herein.

C.1.3 Upon completion of all machining and assembly operations, the contractor shall apply the pre-HYSHMA paint in accordance with reference (c), as modified by Attachment J-1.

C.1.4 Manufacturing workflow including machine loading plans, workflow, material delivery and trial fits shall be identified in the contractor's Propulsor Duct Manufacturing Plan, CDRL A001.

C.1.5 The Contractor shall provide lifting, rigging, and other support services as necessary to load and secure the CONFIDENTIAL IAH AOS onto the Aft Subassembly Alternate shipping fixture, reference (c), in accordance with the Packaging, Preservation and Shipping Plan (CDRL A003) for shipment. The Contractor shall provide written notification to the Contracting Officer Representative (COR) and/or Procuring Contracting Officer (PCO) no less than 60 days prior to planned shipping date. Final shipment shall be identified as an "INTERIM SHIPMENT" in accordance with Reference (a) Note 601.

C.2 CLINS 0002, 0004 AND IF OPTION(S) ARE EXERCISED, CLINS 0006, 0102, 0104, 0106, 0202, 0204, 0208, 0302, 0304, 0306, 0402, 0404, 0406, 0408, 0410

C.2.1 The contractor shall perform all requisite weld repair and associated nondestructive testing in accordance with all applicable references, subordinate and sub-component drawings, approved Welding Procedures (CDRL A004) and approved Welding Procedure Qualification Test Report (CDRL A005).

C.3 CLIN 0005 AND IF OPTION(S) ARE EXERCISED, CLINS 0105, 0207, 0305, 0407 and 0409

C.3.1 The contractor shall machine and assemble the COLUMBIA CLASS AOS Assembly, Reference (e) Items 1, 3-14, and 16-36, from government provided casting in accordance with Reference (e), as modified by the Propulsor Duct Manufacturing Plan (CDRL A001) and Attachment J-2. The government provided casting will be manufactured in accordance with reference (b). The contractor shall execute all work required, up to and including pre-HYSHMA painting. The contractor is not responsible for HYSHMA application or machining and will deliver the AOS assembly as an interim shipment. The contractor is responsible for procuring and installing all hardware associated with the AOS Assembly prior to HYSHMA application. This hardware does not include Polyurea, Molding in place (Reference(e) Item 2), Conduit Flexible Tubing (Reference(e) Item 15).

C.3.2 The Contractor shall inspect the fixed propulsor assembly and its components in accordance with the Inspection and Test Plan, CDRL A002, which is developed by the contractor and approved by NAVSEA, to meet all the requirements of the propulsor drawings, as modified by Attachment J-2, and the requirements herein.

C.3.3 Manufacturing workflow including machine loading plans, workflow, material delivery and trial fits shall be identified in the Propulsor Duct Manufacturing Plan, CDRL A001.

C.3.4 The Contractor shall provide lifting, rigging, and other support services as necessary to load and secure the COLUMBIA AOS onto the Government-provided transport vehicle in accordance with the Packaging, Preservation and Shipping Plan (CDRL A003) for shipment. The Contractor shall provide written notification to the Contracting Officer Representative (COR) and/or Procuring Contracting Officer (PCO) no less than 60 days prior to planned shipping date. Final shipment shall be identified as an "INTERIM SHIPMENT".

C.3.5 The contractor shall procure the CLB Class AOS Assembly Accessory kit and Fastener Kit, AOS to FWD Assembly per References (f) and (g), respectively, as modified by Attachment J-2.

C.4 CLIN OPTIONS (IF EXERCISED) 0007, 0107, 0209, 0307 AND 0411

Upon receipt of a written request from the Contracting Officer, the contractor may perform engineering services in support of propulsor related design review and design change incorporation, drawing creation, or other engineering related tasking.

C.5 CLIN OPTIONS (IF EXERCISED) 0008

Other Direct Costs (ODCs) may be required in support of the engineering services provided under this contract. Specific ODC requirements shall be identified during performance via Technical Instructions (TIs). All ODCs shall receive Government approval via contract modification and a signed TI prior to funds being expended.

C.6 CLIN 0009

The data to be furnished hereunder shall be prepared in accordance with the Contract Data Requirements List, DD Form 1423, Exhibit A.

C.7 GENERAL REQUIREMENTS

C.7.1 Security

The work under this contract requires the contractor to access, handle, store and maintain classified (CONFIDENTIAL) and CUI documents, equipment and hardware in accordance with all referenced drawings, specifications and Security Classification Guides as outlined in this statement of work and Attachment J-2. In performance of this contract, the contractor is required to maintain a CONFIDENTIAL facility security clearance. Throughout the manufacturing process, the contractor shall receive, store and generate classified information or material such as certification documentation. The contractor shall also fabricate, modify or store classified VIRGINIA Class Propulsor hardware throughout the performance of this contract. The contractor shall be required to have access to, receive, store and generate Controlled Unclassified Information (CUI) such as manufacturing and procedural drawings and reports. In order to use the current contract specifications and applicable documentation, the contractor is required to use the Defense Technical Information Center (DTIC).

C.7.2 Biannual Reviews

The contractor shall host a kick-off meeting within the first two (2) months after contract award. Thereafter, the Contractor shall convene biannual progress reviews. These reviews shall be held at the Contractor's facility, or a Subcontractor's facility, as deemed appropriate by the Government. The purpose of these reviews is for the Government to monitor contract status. At a minimum, the following shall be addressed at each biannual review: Tour of the work in progress, manufacturing status, configuration control/quality assurance, waivers and deviations, adherence to contract delivery schedule, action items, and any other information which may impact contract performance or delivery. The Contractor shall prepare a Conference Agenda, CDRL A006 and Conference Minutes, CDRL A007 for the kick-off meeting and all biannual reviews.

C.7.3 Manufacturing Plan

The contractor shall develop a Propulsor Duct Manufacturing Plan that outlines all processes, procedures, equipment and facilities necessary to machine, assemble and paint an IAH AOS and COLUMBIA AOS.

C.7.4 Weekly Status Reports

The Contractor shall submit weekly progress/status reports in accordance with CDRL A008. The report shall clearly demonstrate work progress against the schedule developed in the Manufacturing Plan submitted under CDRL A001 for all undelivered CLINs. The Contractor will attach a Project Planning Chart (CDRL A009) to each weekly status report to provide additional detail into the manufacturing status of each assembly in process for all undelivered CLINs.

C.7.5 Serial Numbers

Major subassemblies and components will be assigned serial numbers by NAVSEA. These serial numbers will be provided to the Contractor in writing and shall be used by the Contractor in applicable procurement and manufacturing efforts.

C.7.6 VIRGINIA Class Requests for Variance

Requests for variance (CDRL A010) for VIRGINIA Class IAH AOS's (waivers or deviations) shall be submitted in accordance with VIRGINIA Class Configuration Control System (VACCS), as required throughout performance of this contract. Requests for variance for COLUMBIA AOS's shall be submitted via DD-1694 as required throughout the performance of this contract.

C.7.7 Submittal of Data Previously Approved

The contractor may submit data previously approved under prior contracts to satisfy technical requirements of this contract where applicable in accordance with CDRL A011. Such data must be clearly marked as previously approved including date approved and name and contact information of the approver. Such data must be clearly marked as previously approved including date approved and name and contact information of the approver.

C.7.8 Welding Procedures/Qualification

The Contractor shall adhere to the requirements for welding and nondestructive testing provided on drawings, as modified by Attachment J-1, the "Configuration CCR Drawing List," and the requirements herein. All fabrication and welding procedures must be approved by NAVSEA prior to welding, in accordance with the Welding Procedures, CDRL A004, and the Welding Procedure Qualification Test Report, CDRL A005.

C.7.9 GFP Shipping Hardware Return

The Contractor shall return all shipping hardware provided with GFP within thirty (30) days after GFP is used in manufacture.
