

**LIMITED-SOURCES JUSTIFICATION [AMENDED ON 03/24/2025]
FOR FEDERAL SUPPLY SCHEDULE (FSS) AWARDS
(FAR SUBPART 8.4)**

**IDENTIFICATION NUMBER PURCHASE REQUEST/
SOLICITATION NUMBER/GSA CONTRACT NUMBER/
TASK ORDER NUMBER
25CR000065/89303025RCR000005/GS-00F-010CA/89303025FCR400010**

[This Limited Sources Justification (LSJ) was amended on March 24, 2025 to extend the original period of performance by three (3) months from 01/01/2025 through 03/31/2025 to 01/01/2025 through 06/30/2025. If circumstances warrant, the duration of performance can be extended by the Contracting Officer for an additional three (3) months with a period of performance ending on 09/30/2025.]

[Additional time is needed to evaluate and finalize the award of the follow-on contract. Moreover, transition activities including but not limited to onboarding and knowledge transfer may need to take place after award to ensure a successful transition. Furthermore, an extension is necessary to ensure the continuity of these critical support services if a lapse in appropriations occurs.]

[An urgent and compelling need exists to ensure continuity of support to meet CESER's Departmental mission to secure the United States energy infrastructure against all hazards, reduce impacts from disruptive events, and assist industry with restoration activities, ensuring a secure and reliable flow of energy to the United States. Without an extension, a break in contractor service may ensue and put at risk CESER's ability to meet its mission.]

1. Contracting Agency and Activity.

The Department of Energy (DOE), Office of Headquarters Procurement Services (MA-64), located in Washington, DC proposes to utilize the GSA Multiple Award Schedule (MAS) vehicle GS-00F-010CA to award a task order bridge contract to ICF Incorporated, LLC with a period of performance from January 1, 2025 to March 31, 2025 **[Amended to a period of performance end date of 06/30/2025 or 09/30/2025]** as a sole source award. The task order will support the Office of Cybersecurity, Energy Security, and Emergency Response (CESER) for Technical, Analytical, and Management Support Services (TAMSS) for the Preparedness, Policy and Risk Analysis (PPRA) Division.

This document sets forth the justification for limiting sources in accordance with the circumstances described under FAR 8.405-6(a)(1)(i)(A) "Urgent and compelling need exists, and following the procedures would result in unacceptable delays".

2. Nature and/or Description of the Action Being Approved.

This document sets forth the justification and approval for award of a task order on a limited source basis as required by FAR 8.405-6. This acquisition is conducted under the authority of the Multiple-Award Schedule Program (41 U.S.C. 251, et seq. and 40 U.S.C. 501).

This urgent and compelling action is for a sole-source Time & Materials (T&M) bridge task order against the GSA Professional Services Schedule (PSS) (SIN 541611) under the Federal Supply Schedule (FSS) No. GS-00F-010CA with a three (3) month period of performance from January 1, 2025 through March 31, 2025. **[Amended to a period of performance end date of 06/30/2025 or 09/30/2025]** The task order will follow the terms and conditions of FSS GS-00F-010CA and the associated task order. The proposed offeror is an "Other Than Small Business" with a Unique Entity Identifier (UEI) of QHBLBNKKV4U3 and NAICS code of 541611-Administrative Management and General Management Consulting Services.

Contractor Name and Address:

ICF Incorporated, LLC
9300 Lee Highway
Fairfax, VA 22031-6050
UEI: QHBLBNKKV4U3

CAGE: 5M571

GSA Schedule Number: GS-00F-010CA

GSA Schedule Name/SIN: Professional Services-Business Administrative Services/Management and Financial Consulting, Acquisition and Grants Management Support, and Business Program and Project Management Services/541611

Period of Performance: 01/01/2025 to 03/31/2025 **[Amended to a period of performance end date of 06/30/2025 or 09/30/2025]**

IGCE Dollar Value of this action: \$ [REDACTED] **[Amended to \$ [REDACTED], \$ [REDACTED] per each 3-month period]**

[The estimated total cost for each three (3) month extension from April 1, 2025 through June 30, 2025 and July 1, 2025 through September 30, 2025 will be in close proximity to the original IGCE of \$ [REDACTED] because of the continuation of activities outlined in the Performance Work Statement (PWS)].

3. Description of Supplies and/or Services (Including the Estimated Value).

The CESER program office requires contractor support to assist CESER in fulfilling its Departmental mission to secure U.S. energy infrastructure against all hazards, reduce impacts from disruptive events, and assist industry with restoration activities, ensuring a secure and reliable flow of energy to the United States. In order to support CESER in fulfilling its mission the contractor shall provide services for technical, analytical, management, and IT support. This work includes strategic and operational planning, program/project management, technical communications, research, analysis, modeling, development of technical studies, technical editing, and

preparation of reports and presentations on energy security, energy systems and interdependent sectors, as necessary.

The tasks to be completed under this task order at a high level are 1) Energy Sector Exercises and Training Program, 2) Risk and Hazard Analysis, 3) Sector Engagement, 4) State and Local Energy Assurance Support, 5) International Security and Operations, 6) Cyber Preparedness, 7) Critical Energy Infrastructure Studies for States and 8) Phase II Resources for State Energy Security Plans.

Some PPRA program themes that will be supported by the contractor include but are not limited to are 1) enhancing the energy sector's preparedness to all hazards, risks and threats, through the development of sector focused exercises, 2) making critical energy functions, systems, and assets more resilient through mitigation development, and collaborative tasks with industry and governments; and 3) collaborating with federal, state, local, territorial, tribal, and international governments, National Laboratories, industry and other energy sector stakeholders to improve security, enhance resilience, and expedite response.

This work will have an expected three (3) month period of performance from January 1, 2025 through March 31, 2025[Amended to a period of performance end date of 06/30/2025 or 09/30/2025] with an estimated total price of \$ [REDACTED] [Amended to \$ [REDACTED], \$ [REDACTED] per each 3-month period]

Item Num.	Description	Estimated Total Value
00001	Exercises & Training	\$ [REDACTED]
00002	Risk & Hazard Analysis	\$ [REDACTED]
00003	Sector Engagement	\$ [REDACTED]
00004	Cyber CR	\$ [REDACTED]
Grand Total:		\$ [REDACTED]

[Each three (3) month extension will entail similar work requirements as completed in the initial three (3) month period of performance for CLINs 00001, 00002, 00003, and 00004. Therefore, the total cost for the period of performance from April 1, 2025 through June 30, 2025 and July 1, 2025 through September 30, 2025 is estimated to be in close proximity to the above referenced estimated value of \$ [REDACTED] for each 3-month period.]

4. An identification of the LSJ rationale, and demonstration of the contractor's unique qualifications to provide the required supply or service.

In accordance with FAR 8.405-6 (a)(1)(i)(A) – an urgent or compelling need exists and following the procedures would result in unacceptable delays.

The three (3) month bridge contract will allow for the completion of the competitive acquisition of CESER's new and expanded requirements, with an estimated award of

March 7, 2025; therefore an urgent and compelling need exists to ensure continuity of support until an award is made. If a break in these contractor support services were to occur, it could jeopardize CESER's ability to meet its mission

The scope of this sole-source action is to award a task order to ICF Incorporated for a three (3) month period of performance from January 1, 2025 through March 31, 2025. **[Amended to a period of performance end date of 06/30/2025 or 09/30/2025]** to avoid a lapse in service. ICF Incorporated currently provides support to CESER in coordinating national efforts to secure the energy infrastructure against all hazards and reduce impacts from disruptive events through another contract vehicle. More specifically the contractor will provide the following tasks as described at a high level; Energy Sector Exercises and Training Program, Risk and Hazard Analysis, Sector Engagement, State and Local Energy Assurance Support, International Security and Operations, Cyber Preparedness, Critical Energy Infrastructure Studies for States and Phase II Resources for State Energy Security Plans. Some of the themes to be completed under the aforementioned tasks are 1) enhancing the energy sector's preparedness to all hazards, risks and threats, through the development of sector focused exercises, 2) making critical energy functions, systems, and assets more resilient through mitigation development, and collaborative tasks with industry and governments and 4) collaborating with federal, state, local, territorial, tribal, and international governments, National Laboratories, industry and other energy sector stakeholders to improve security, enhance resilience, and expedite response.

These contractor support activities are anticipated to be a part of CESER's new and expanded requirements in an upcoming acquisition and an urgent and compelling need exists to ensure continuity of support until an award is made. If a break in these contractor support services were to occur, it could jeopardize CESER's ability to meet its mission. Specifically, CESER's ability in securing the energy sector from natural disasters, adversarial threats and technological hazards and accidents would be impacted potentially causing further injuries to the electrical grid, people, and property. Likewise, the facilitating the restoration of critical energy functions, systems and infrastructure post-impact would be impacted.

ICF Incorporated existing and prior experience supporting these activities makes them uniquely positioned to avoid a lapse in support and ensure continuity. They have an awareness of CESER internal processes and key stakeholders. Moreover, they are situated to provide rapid response to emergencies or emerging threats. Until a new contractor is onboarded and properly transitioned, an urgent and compelling need exists for ICF Incorporated to provide these support services. Correspondingly, a three (3) month **[Amended to a six (6) to nine (9) month]** bridge task order is required and necessary to avoid any unacceptable delays and minimize the potential impacts to CESER's ability to meet its vital mission.

5. Ordering Activity Contracting Officer Determination of Best Value (Consistent with 8.404(d)).

The Program Office has utilized these services previously and understands the labor hours and mix of labor needed to successfully complete the required tasks. The Contracting Officer will utilize historical data and the government IGCE to confirm the rates, labor hours and mix are sufficient to successfully complete the requirements under this task order.

Further, in accordance with FAR 8.404(d), "GSA has already determined the prices of supplies and fixed-price services, and rates for services offered at hourly rates, under schedule contracts to be fair and reasonable." And, in accordance with FAR 8.405-4, "...the ordering activity shall seek a price reduction when the order or BPA exceeds the simplified acquisition threshold." The Contracting Officer will request a reduction in the GSA labor rates incorporated in the FSS GSA No. GS-00F-010CA contract which was already determined to be fair and reasonable. **[The fully burdened labor category rates for the base period (January 1, 2025 through March 31, 2025) will be utilized for the two 3-month extensions through September 30, 2025, if needed.]**

6. Description of the Market Research Conducted Among Schedule Holders and the Results or a Statement of the Reason Market Research was not Conducted.

Market research will not be conducted to implement the three (3) month bridge task order due to the aforementioned urgent and compelling need and to avoid unacceptable delays. **[The DOE synopsisized the initial extension in accordance with FAR Subpart 5.2; therefore, we did not synopsisize this subsequent extension. Please reference section 9 of this LSJ for the original details of the synopsis.]**

7. Any other facts supporting the justification.

The Government did not solicit from any other sources. However, the Government intends to publicize this LSJ after executing the three (3) month bridge task order to the Government-wide Point of Entry (SAM.gov) for a minimum of 30-days in accordance with FAR 8.405-6 (a)(2)(i). **[The Government will post the amended LSJ through the government-wide point of entry website System for Award Management (SAM.gov) after the initial three (3) month extension is fully executed for a minimum of 30-days in accordance with FAR 8.405-6 (a)(2)(i).]**

8. Actions to Overcome Barriers to Competition.

CESER's new and expanded requirements will be competed under the National Nuclear Security Administration (NNSA)/Department of Energy (DOE) Technical, Engineering, and Programmatic Support Services III (TEPS III) Multiple Award Blanket Purchase Agreement (BPA) among the nine (9) Contractor Team

Arrangement (CTA) BPA holders. The release of the solicitation has occurred, and the competitive acquisition process is currently ongoing. **[Additional time is needed to evaluate and finalize the award of the follow-on contract.]**

9. A Listing of the Sources, if Any, that Expressed a Written Interest in the Acquisition

[The DOE synopsisized the initial extension in accordance with FAR Subpart 5.2; therefore, we did not synopsisize this subsequent extension. Below are original details of the synopsis.]

In accordance with the requirements for FAR Subpart 5.2, Synopses of Proposed Actions, a Notice of Intent to award a three (3) month bridge task order was synopsisized on SAM.gov under Notice ID 25CR000065 at 4:45pm EST on November 22, 2024 with a response date (Inactive Policy) by December 7, 2024. A response was received from Tech Army. The following table provides their response:

Contractor	Feedback
Tech Army	The contractor did not provide their capability statement in their response. Contractor is interested in participating in the Technical, Analytical and Management Support Services listed in the Notice of Intent and has requested further details about the requirements. Contractor details provided: 8(a) certified, specializing in IT Consulting, Staff Augmentation, and Custom Software Development, NAICS codes 541511, 541512, 541513, 541519, 561312, 561320, and 541611. Partnership with DOE laboratories: Fermi National Laboratory, Argonne National Laboratory, Savannah River National Laboratory, Los Alamos National Laboratory, and Idaho National Laboratory.

As discussed previously, a three (3) month bridge task order is required and necessary to avoid any unacceptable delays and minimize the potential impacts to CESER's ability to meet its mission. DOE noted in the Notice of Intent our intent to award a three (3) month bridge task order to ICF Incorporated and advised the notice was neither a request for proposal nor an invitation for bids.
