

Single Source Justification (Simplified Acquisition)

Section A: General Contract Information

Is this a Bridge Action as defined in the [AF Bridge Action Reduction Plan](#)? ☐ Yes ☒ No

Contracting Activity: AFTC/PZI (Holloman)

Project/Program Name: Standpoint Live Sync Hardware & Software Option

Purchase Request / Local ID Number: TBD

Estimated Contract Cost (including Options): [REDACTED]

Section B: Description of the Supplies/Services Required

The purpose of this contract is to obtain Standpoint Live Sync Hardware & Software Option to integrate with the 746th Test Squadron's (746 TS) Spirent GSS9000 simulator systems. This hardware and software solution is to use a reference receiver to acquire live sky Global Navigation Satellite System (GNSS) signals. Then use the signals to synchronize the current Spirent GSS9000 simulators with live sky data.

Section C: Justification for Soliciting from a Single Source or Brand Name

Spirent developed the GPS simulators that the USG (United States Government) owns and utilizes. Further, they developed a specialized military interface for simulators, as well as the operating software and the classified security and software modules in accordance with strict DoD requirements. Spirent is the Original Equipment Manufacturer (OEM) for these proprietary simulator systems and no other vendor is able to provide additional hardware, software, or support to these simulators. Sole source justification letter from Spirent Federal Systems is attached to this package.

The 746 TS has been using the Spirent Federal GPS simulator to test military's GPS receiver capabilities for many years; and currently needs the ability to acquire live sky data. Then it will be used to sync the current GSS9000 simulators to live sky to gain a more realistic test signal out of the simulators.

The USG is requesting the acquisition of this turn key solution, which is capable of interfacing with the current Spirent GSS9000 simulator systems currently in place. After much research, no alternatives were found to interface with the Spirent simulators due to being proprietary equipment. The cost of the standpoint solution is [REDACTED] and can be used with current Spirent simulators. The alternative to using the Spirent simulator and this purchase would be to have a custom solution created and purchase a new brand of simulators and standpoint equipment. A new brand of simulators alone would be in the range of [REDACTED] if not more after all equipment was replaced. Additional costs for training would occur and down-time would occur due to unfamiliarity with different products/technology. While considering other alternatives, the added cost would not be recovered within the expected life of the instrument.

Section D: Efforts to Obtain Competition

In light of the USG investment information highlighted in Section C, additional measures were taken to confirm no other sources existed to provide the Standpoint Live Sync Hardware & Software Option for the Spirent simulators. Market research has included internet searches, reviews of acquisition history (which have been sole source), discussions with the customer for other possible sources, and discussions with Spirent to determine any existing distribution and support network they have in place. It was verified that no other company can meet requirements due to proprietary rights.

Section E: Steps to Preclude Future Single Source or Brand Name Awards

The USG continues to keep abreast of changes in the GPS simulation market through review of trade journals, attendance at

Single Source Justification (Simplified Acquisition)

trade shows, and attendance at educational seminars. In the event a competing product becomes available or Spirent implements a distribution network, the USG will attempt to compete any future efforts.

Section F: Contracting Officer's Determination

I have determined, in accordance with [FAR 13.106-1\(b\)\(1\)](#), that the circumstances of this contract action deem only a single source is reasonably available.
