

**Single Source Justification (Simplified Acquisition)****Section A: General Contract Information**Is this a Bridge Action as defined in the [AF Bridge Action Reduction Plan](#)?☐ Yes☒ No

Contracting Activity: AFTC/PZI (Holloman)

Project/Program Name: Systems Tool Kit (STK) Software Renewal 2025

Purchase Request / Local ID Number: TBD

Estimated Contract Cost (including Options): [REDACTED]

Section B: Description of the Supplies/Services Required

The 704th Test Group (704 TG) mission is the premier provider of unique test and evaluation capabilities relevant to tomorrow's warfighter through world-class people improving technical excellence, cost-effectiveness, and agility. The 746th Test Squadron (746 TS) is assigned to the 704 TG.

The 746 TS uses the Systems Tool Kit (STK) developed by [REDACTED] to provide engineering support for conjunction analysis, maneuver modeling, orbit trajectory modeling, orbit determination, system performance analysis, aircraft and UAV modeling, communication link analysis, sensor modeling, antenna modeling, terrain modeling, mission modeling and weather and atmospheric effects.

Section C: Justification for Soliciting from a Single Source or Brand Name

The STK is a unique software modeling environment that provides the 746th with verified results in the test planning, execution, post flight analysis, safety of flight assessments, radio frequency (RF) interference data in a time dynamic data analysis engine that no other vendor can provide.

[REDACTED] has provided confirmation that their software product line, including STK, are products solely manufactured, owned, sold, distributed and supported by their company. There are not authorized distributors or resellers.

The impact to the government if not allowed to purchase directly from this company would be extremely costly. The Test Group would need to research and invest in a completely different software package or combination of packages to support their analysis and modeling at the level of STK. This includes not only the purchase and licensing costs of new software but labor hours of government personnel for research and training. It is estimated the total cost to the government for this alternative would be [REDACTED]

Additionally, different alternative might require a combination of multiple software alternatives to achieve current STK capability.

Section D: Efforts to Obtain Competition

The STK was specified and selected for the services listed in justification. STK was created specifically to assist the Department of Defense develop this type of modeling and analysis support. There are at this time no other vendors that have this comparable capability. Efforts to conduct web searches and network within the GPS community yielded no results.

Section E: Steps to Preclude Future Single Source or Brand Name Awards

The testing of new defense technologies for which there are no current test procedures established often require innovative methodologies and software products. Market research included Internet searches, reviews of acquisition history and

Single Source Justification (Simplified Acquisition)

discussion with the vendor. The 746 TS is continually conducting market research and surveying the market in the event that future requirement may be satisfied in a competitive environment and will continue to strive for COTS solutions for our testing requirements where such exists.

Section F: Contracting Officer's Determination

I have determined, in accordance with [FAR 13.106-1\(b\)\(1\)](#), that the circumstances of this contract action deem only a single source is reasonably available.
