Project

To acquire on-going Licensing and Support for the Labworks Laboratory Information Management System (LIMS).

General Information

1.0 Scope of Work

USDA, MRP is looking to renew Labworks LIMS Licensing and Support through contract with a single contractor. The contractor will provide costing for licensing and support.

2.0 Background

The main organization that will be managing this contract is the United States Department of Agriculture (USDA), Market and Regulator Programs (MRP), Agricultural Marketing Service (AMS), Science and Technology Program (S&T). The USDA MRP AMS Federal Grain Inspection Service (FGIS), National Grain Center (NGC) is associated with this contract as they use the Labworks LIMS.

AMS laboratories need to remain a scientific leader within programs that create domestic and international marketing opportunities for U.S. producers of food, fiber, and specialty crops which provides the agriculture industry with valuable services to ensure the quality and availability of wholesome food for consumers across the country and around the world. AMS uses a commercial-off-the-shelf (COTS) software provided by Labworks, LLC. The Labworks LIMS is software that improves laboratory productivity by providing an efficient means to manage samples, track inventory, input results, integrate instrument data, and produce reports of sample results. The LIMS is central to the operation and management of a laboratory, testing data and business needs.

The Labworks LIMS was created as an enterprise level system in the USDA MRP Azure Gov Cloud. The implementation is accessed by using Citrix Virtual Apps.
