

Special Notice

SUBJECT* Specialized Genetic Sequencing Services (VA Research Study)

GENERAL INFORMATION

CONTRACTING OFFICE'S ZIP CODE*	15215-1802
SOLICITATION NUMBER*	36C24E25Q0034
RESPONSE DATE/TIME/ZONE	03-26-2025 11:59 EASTERN TIME, NEW YORK, USA
ARCHIVE	60 DAYS AFTER THE RESPONSE DATE
RECOVERY ACT FUNDS	N
PRODUCT SERVICE CODE*	AN11
NAICS CODE*	541715
CONTRACTING OFFICE ADDRESS	Veterans Health Administration Regional Procurement Office East Building 32 Suite 1A1111 1010 Delafield Road Pittsburgh PA 15215-1802
POINT OF CONTACT*	Contracting Officer Ms. Millicent Covert millicent.covert@va.gov (Calls shall not be taken)

Special Notice

Special Notice

DESCRIPTION

Regional Procurement Office (RPO) - East intends to negotiate on a sole source basis, pursuant to FAR 6.302-1, with Novogene Corporation, Inc., for specialized genetic sequencing services for the Research Department at the Minneapolis VA Health Care System. These services are required for the VA-funded research study "Impact of Obesity on Brain Immune Response and Cognition".

The objective of the study is to determine key features that differentiate the spatial configuration and expression profile of mouse brain from either WT or Alzheimer's Disease expressing (AD) mice with confounding factors such as high-fat diet or environmental toxin exposure. We may identify new targets for AD treatment by identifying two new mechanisms of disease progression: 1) Enhanced neuroinflammation due to exacerbation of inflammatory factors due to high-fat diet or environmental toxin exposure in the AD background. 2) Identification of new disease mechanisms may improve the care of Veterans with AD, high-fat diet, and/or environmental toxin exposure thereby decreasing costs for the Veterans Affairs Health Care System.

Highly experienced in providing data from large-scale sequencing projects, Novogene has been involved in previous studies directly related to the current study. To ensure consistent support, data readability and compatibility, continuation of Novogene's services is crucial to the study's successful outcome.

Novogene (contractor/contractor laboratory) shall:

- Process, sequence, and quantify the RNA from samples on a massive scale with high-accuracy, dependability, and reproducibility.
- Perform RNA library preparation, sequence the RNA, and prepare a data output including sequence identity and quantity for all samples.
- Provide start-to-finish advanced genetic sequencing and quantitation services tailored to the analysis of single-cells.
- Provide accurate and reproducible quantitative results for a variety of tissue types and sequencing modalities.

The VA laboratory anticipates sending 4 to 20 samples per year depending on experimental outcomes.

This is a notice of intent and is not a request for competitive quotes; however, any responsible source that believes it is qualified to meet this unique need may submit a capability statement to the contracting office no later than **Wednesday, March 26, 2025, 11:59 AM EST**.

Interest/capability statements may be sent to Millicent Covert, Contracting Officer, at millicent.covert@va.gov. No telephone responses will be accepted. A determination not to

Special Notice

complete the proposed requirement based upon the responses to this notice is solely within the discretion of the Government.
