

STATEMENT OF WORK

HAAS 5-axis CNC MILLING MACHINE RIGGING AND PLACEMENT

Description: This Statement of Work (SOW) is in support of the Fleet Readiness Center West (FRCW) located in Lemoore, California. FRCW has a requirement for installation and rigging of the 5-Axis CNC Milling Machine.

General Information:

The contractor shall provide all necessary equipment to carry out the unloading and placement of the 30,000lb, HAAS CNC 5-axis Milling Machine, including delivery vehicles, forklifts, and any other rigging tools needed for successful placement. FRCW will provide a clear and accessible pathway for the contractor to unload and transfer the 5-axis machine into its designated position within the required facility at 51F. Once the machine is positioned, FRCW will proceed to hook it up to power and air.

Requirements: The Contractor must be a Haas Certified Technician to perform installation and rigging on HAAS equipment, specifically the 5-axis CNC Milling Machine as outlined below. Upon award of the contract, the Contractor will be responsible for the installation and rigging of the CNC Milling Machine, ensuring it meets OEM specifications. An invoice detailing all associated costs shall be provided upon completion of the installation.

Government Equipment Furnished: The FRCW shall be responsible for the disposal of all packaging and crating materials from the 5-axis machine.

Transportation: The Contractor shall provide their own transportation to the work site (NAS Lemoore, CA). No less than two weeks prior to arrival, the Contractor shall submit required NAS Lemoore base access request forms (available upon request from FRCW points of contact) with all required information; this provides FRCW sufficient time to coordinate with NAS Lemoore Security for Contractor's arrival.

Period of Performance: Upon awarding of the contract, the Contractor has 30 working days to schedule a service date and 90 working days to complete work.
