

Limited Sources Justification

FAR Part 8.4 -Federal Supply Schedule

1. Identification of the Agency and Contracting Activity

The Department of Labor, Office of Inspector General (DOL OIG) is the contracting agency responsible for the procurement action covered by this Limited Sources Justification (LSJ). The contracting activity is the Division of Procurement within the Office of Inspector General, which oversees the acquisition and management of contracts necessary to support DOL OIG operations.

2. Nature and Description of the Action being Approved

The Department of Labor, Office of Inspector General, is seeking approval for the immediate acquisition of an on-premises Opexus case management solution. Due to the critical nature of the data housed within the system and the urgency of maintaining operational continuity, this procurement is necessary to ensure the integrity and security of ongoing investigations. The Opexus system is already in use, and given the sensitivity of the information it contains -including case details, evidence records, and investigative data -it is imperative that any transition or upgrade maintains strict chain-of-custody requirements.

Ensuing the uninterrupted functionality of the case management system is vital to DOL OIG's mission and the broader objectives of the Department of Justice, as any compromise of the integrity of investigative data could have severe legal and operational consequences. The contractor is AINs, LLC., 1101 17th St NW, Washington, DC 20036.

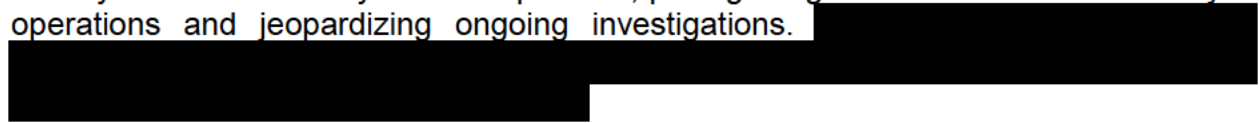

3. A Description of the Supplies or Services Required to Meet the Agency's Needs (Including the Estimated Value)

The DOL OIG requires an on-premises implementation of the Opexus case management system to support ongoing investigative and enforcement activities. This system is critical to DOL OIG's ability to track, manage, and maintain case records, ensuring the integrity of investigative data and compliance with legal and evidentiary standards. Given the sensitivity of the information stored within the system, including case files, evidence log, and investigative notes, the need for a secure, on-premises solution is paramount.

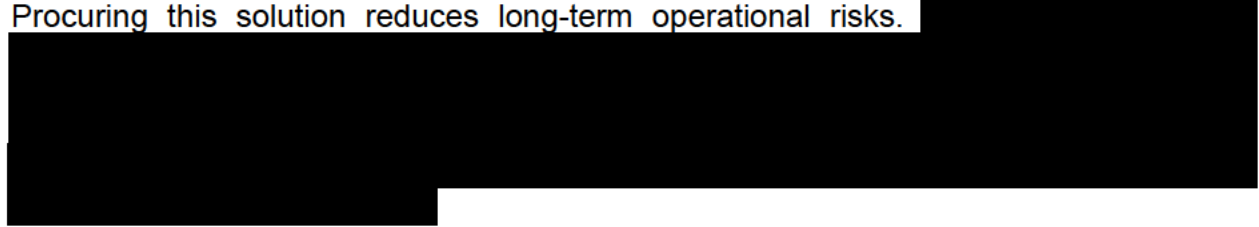

4. Identification of the Authority and Rationale:

This Limited Sources Justification (LSJ) is issued in accordance with FAR 8.405-6(a)(1)(B), which allows for limiting sources when the required sources are available from only one source and no other supplies or services will satisfy agency requirements. The Opexus case management system is already in use by the DOL OIG and is critical to maintaining the integrity of investigative data. Due to the nature of the system, which houses sensitive case files, evidence records, and investigative documentation, migrating to an alternative platform is not feasible within the required timeframe. Transitioning to a new system would take years to implement, posing a significant risk to the continuity of operations and jeopardizing ongoing investigations.

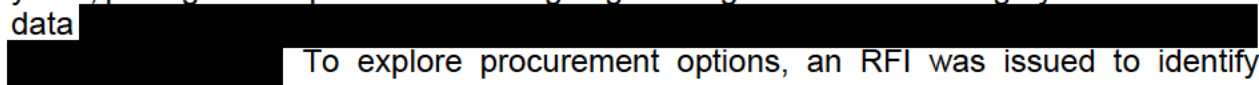

5. Determination by the Ordering Activity that the Order Represents the Best Value FAR 8.404(d):

The proposed acquisition of the on-premises Opexus case management system represents the best value to the government by ensuring continuity of operations, data integrity, and security while avoiding the significant costs and risks associated with transitioning to an alternative system. Given the critical nature of the data housed within Opexus -case records, evidence logs, and investigative materials -any disruption or loss of information could severely impact DOL OIG'S mission and comprise legal proceedings. Procuring this solution reduces long-term operational risks.

6. A Description of Market Research Conducted and the Results or a Statement of the Reason Market Research was Not Conducted:

Market research was conducted to evaluate the feasibility of alternative case management systems, the potential for migrating to a different platform, and the availability of authorized resellers for Opexus. DOL OIG assessed the time, cost, and risk associated with transitioning to a new system and determined that migration would take years, posing unacceptable risks to ongoing investigations and the integrity of critical case data

To explore procurement options, an RFI was issued to identify

authorized resellers capable of providing the required solution.

7. Any Other Facts Supporting the Justification:

None

8. A Statement of Actions, if any, the Agency May Take to Remove or Overcome Any Barriers to Competition Before Any Subsequent Acquisition for the Supplies or Services is Made:

There are no actions that DOL OIG can take to remove or overcome barriers to competition for this requirement. However, DOL OIG is committed to moving to compatible software in the future which may open competition.

9. Technical Certification:

The program official further certifies that no conflict of interest exists in awarding a sole source contract to the contractor identified herein.

I hereby certify that the supporting data, which are the responsibility of the technical personnel, and which forms a basis for this justification, is complete and accurate.

Christopher Silvern, Program Official

Date

Contracting Officer's Certification:

I certify this justification is accurate and complete to the best of my knowledge and belief.

Danit Johnson, Contracting Officer
