Notice of Intent to Contract for AE Services **DOIPFBO250018**

Date: March 17, 2025

Closing Response Due: 5:00 pm Mountain Time (MT) on April 16, 2025.

Point of Contact / Contracting Officer: Amber Hughes, amber_hughes@nps.gov

Contract Information: This contract is being procured in accordance with the Selection of Architects and Engineers Statute (Brooks Act) as implemented in FAR Subpart 36.6. Firms will be selected for negotiations based on demonstrated competence and qualifications (SF-330) for the required work. The NAICS code for this acquisition is 541310 with a size standard of \$12.5M. This announcement is open to all businesses regardless of size. A hybrid Firm-Fixed-Price/Time and Materials single award contract will be negotiated.

Product or Service Code: C211 – Architect & Engineering (General)

Place of Performance: Wrangell St. Elias National Park and Preserve in Glennallen, Alaska.

Nature of Work: The Department of the Interior (DOI), National Park Service (NPS), Denver Service Center (DSC) is posting this notice of intent to contract for AE services, specifically that of “Title III.” The construction project is located within the Wrangell St. Elias National Park and Preserve in Glennallen, Alaska. The required AE services for this contract include, but are not limited to: solicitation support, submittal reviews, Request for Information (RFI) responses, office services, site visits, preparation of as-constructed drawings, and securing regulatory approvals – to ensure compliance with the original design and agency requirements. The estimated period of performance is April 2025 to July 2026. No solicitation is available at this time and no technical questions will be answered for this requirement.

Evaluation Criteria: In accordance with FAR 36.602-1, each firm is evaluated in terms of the following factors:

- **Factor 1** - Professional qualifications necessary for satisfactory performance of required services.
- **Factor 2** - Specialized experience in design of complex water treatment systems, treating extremely poor-quality groundwater, including the development of plans, project specific specifications, and development of reliable construction cost estimates; located in areas of extreme conditions such as extreme cold temperatures, permafrost, frost heaving, and seismic activity.
- **Factor 3** - Capacity to accomplish the work in the required time.
- **Factor 4** - Past performance on contracts with Government agencies and private industry in terms of cost control, quality of work, and compliance with performance schedules.
- **Factor 5** - Location in the general geographical area of the project and knowledge of the locality and remoteness of the project; Special consideration will be given for demonstrated similar experience in Alaska.
- **Factor 6** - Team members’ (key personnel and subcontractors) with more relevant experience / qualifications will be rated more favorably. Key subcontractors with experience working with the Prime Contractor will be rated more favorably. Key subcontractors and personnel include Project Manager, Civil Engineer (specializing in water treatment) and Geotechnical Engineer.
