

Single Source Justification (Simplified Acquisition)

Section A: General Contract Information

Is this a Bridge Action as defined in the [AF Bridge Action Reduction Plan](#)?

☐ Yes

☒ No

Contracting Activity: 49 CONS/PKA

Project/Program Name: Government Vehicle Wash Facility Upgrade

Purchase Request / Local ID Number: F2E3LD4302AW01

Section B: Description of the Supplies/Services Required

Government vehicle wash facility at Holloman Air Force Base requires updates and refresh of systems and equipment, this equipment requires 5 year service contract/warranty.

Section C: Justification for Soliciting from a Single Source or Brand Name

IAW AFI 24-301 Ground Transportation is charged with maintaining the installation Government Owned Vehicle wash facility, this is a key component in corrosion control for 790 vehicles across Holloman. The current carwash requires a refresh due to aging waterlines, brushes, pressure washers, and a subpar soft water system. Washing Equipment of Texas (WET) is the only company that can provide a quote to refresh the current system and ensure it remains operational with a warranty of 5 years on the entire system. This will streamline any repairs required by having WET completing any repairs within 5 business days. Our current procedures include having them come out to quote repairs, then we must request funding approval and pay for them to make another trip to Holloman AFB to complete repairs often taking over a month complete routine maintenance repairs. With the close proximity of Washing Equipment of Texas, and the warranty we can ensure these repairs are done in a timely manner as we can have them complete repairs without making multiple trips, the other companies capable of doing repairs would not provide warranty nor are they located close enough to come to our location to complete repairs. Washing Equipment of Texas also currently services the FSS vehicle wash system on Holloman that services personally owned vehicles and they are frequently in the area. All other companies would either not provide a quote because they wanted to replace the entire wash system with their own components, or they would not provide the warranty needed for us to ensure timely repairs when things go wrong.

Washing Equipment of Texas was the only company that would provide a warranty for their work, this is crucial in keeping the Government Vehicle Wash system operational.

Section D: Efforts to Obtain Competition

Market research determined other companies do handle this type of equipment however due to the current system in place, Washing Equipment of Texas (WET) is the only company that can provide a quote to refresh the current system and ensure it remains operational with a warranty of 5 years on the entire system. This will streamline any repairs required by having WET completing any repairs within 5 business days.

Section E: Steps to Preclude Future Single Source or Brand Name Awards

To avoid the need of sole source in the future, the necessary actions would be to entirely replace the current system in place to a new stand alone system that would not require a certain company that interfaces in specialty with that system.

Single Source Justification (Simplified Acquisition)

Section F: Contracting Officer's Determination

I have determined, in accordance with [FAR 13.106-1\(b\)\(1\)](#), that the circumstances of this contract action deem only a single source is reasonably available.
