

Limited-Sources Justification

1. Defense Logistics Agency (DLA) Troop Support, Medical Supplier Operations, Electronic Catalog (ECAT) Division is the contracting activity.

2. This justification is for the acquisition of a unique and highly specialized brand-name product essential to the Government's requirements under [REDACTED]
[REDACTED]

3. Brook Army Medical Center (HT0853), has the following requirement:

Item Description(s): Stryker System 9 Dual Trigger Rotary Handpiece

Manufacturer: Stryker Corp.

Manufacturer Part Number(s): 9205-000-000

Total Quantity: 22
[REDACTED]

<i>Item/Description</i>	<i>Part #</i>	<i>Qty.</i>
SYSTEM 9 DUAL TRIGGER ROTARY HANDPIECE	9205-000-000	22

BAMC requires rotary handpieces to support a variety of surgical procedures, including orthopedics, sports medicine, podiatry trauma, and neurosurgery. The rotary handpieces must meet the following minimum requirements:

- (a.) capable of drilling, reaming, and decorticating bone and tissue and placement of fixation devices;
- (b.) interoperable with existing equipment, accessories, and consumables

4. This action is being conducted under the authority of the ECAT Multiple Award Schedule Program. The circumstances justifying waiving the competition requirements is FAR 8.405-6(a)(1)(i)(B) – Only one source is capable of providing the supplies required at the level of quality required because the supplies are unique or highly specialized. As explained below, this particular product is essential to the Government's requirements, and market research has established that no other companies' products meet the Government's requirements.

The Stryker System 9 Dual Trigger Rotary Handpiece is the only product on the market that is fully compatible with the products that have already been purchased, in large quantity, and are currently in clinical use in the operating room.

Existing equipment in use and on hand includes but is not limited to the following Stryker System 9 compatible items:

Part Number	Item Description
4100-062-000	WIRE COLLET
4100-120-000	T-LATCH
4100-126-000	ADJUSTABLE PIN COLLET
4100-131-000	1/4 INCH DRILL WITH JACOBS CHUCK
4100-260-000	TRINKLE REAMER
4100-132-000	5/32 INCH DRILL WITH JACOBS CHUCK
4100-135-000	HUDSON/MODIFIED TRINKLE DRILL
4607-654-000	TRAUMA 3 HANDPIECE SOLID CONTAINER BUNDL
4100-700-000	CORDLESS DRIVER HIGH SPEED BUR ATTACHMENT
4100-231-000	1/4 INCH REAMER WITH JACOBS CHUCK
4605-000-000	SYSTEM 9 CORDLESS DRIVER
4608-000-000	SYSTEM 9 SABO SAGITTAL SAW
4100-110-000	SYNTHE DRILL
9212-000-000	SYSTEM 9 SMALL BATTERY
9215-000-000	SYSTEM 9 LARGE BATTERY

The required product is interoperable with existing Stryker units in place at the facility (listed above) and utilizing products from two different manufacturers (incompatible by design by the manufacturers), greatly increases risk to patient safety. If the wrong component is accidentally placed into the wrong drill or saw and used for a patient procedure, due to the high drill (1200 rpm) and ream (270 rpm) speeds the component could wobble, shake, or spin out of the handpiece causing bone or tissue damage to a patient or inaccurate wire or pin placements. This endangers the life of not only the patient, but also the lives of the staff.

No other manufacturer has the capability of meeting the Brook Army Medical Center requirements listed above. Only the Stryker System 9 Dual Trigger Rotary Handpiece is capable of satisfying the requirement. [REDACTED]

[REDACTED] This suggested source can furnish the requirements to the exclusion of other sources.

5. DLA Troop Support has already determined the prices of the supplies under the ECAT Multiple Award Schedule Program fair and reasonable based on a favorable comparison to other than certified cost or pricing data. [REDACTED]

[REDACTED] his acquisition represents the best value to the Government consistent with FAR 8.404(d).

6. Market research was conducted using the FDA website, Google, and Emergency Care Research Institute (ECRI) data and published literature in order to determine which orthopedic

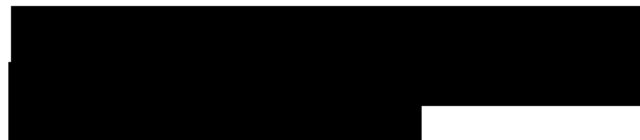

power tool system, components, and accessories best meets the needs of Brook Army Medical Center. Within the product category of drill and saw systems, the available products identified were the Stryker System 9 Dual Trigger Rotary Handpiece, Zimmer Biomet X Series, and the DePuy Synthes Orthopedic Power Tool system. The Zimmer and DePuy items are not compatible with existing Stryker Drill Sets, accessories, interfaces, and battery mechanisms currently in place at the facility. Therefore, they fail to satisfy minimum requirement (b). Instead, these manufacturers offer proprietary equipment, meant to ensure that only their branded components work with their branded drills. Failure to do so introduces greater risk of patient injury and death. The Stryker System 9 Dual Trigger Rotary Handpiece is the only item that is compatible with current inventory. Only the Stryker System 9 Dual Trigger Rotary Handpiece is capable of satisfying the requirements of the Brook Army Medical Center. In considering the market research noted by Brook Army Medical Center, and verified by a DLA Troop Support acquisition specialist and quality assurance specialist, I concur with the results of their technical evaluation.

7. ECAT vendors have the opportunity to add products that fall within scope of the ECAT contract regularly, thereby increasing competition. In order to remove or overcome any barriers that led to this restricted consideration before any subsequent acquisition for the supplies or services is made, DLA Troop Support will continue to attempt to locate other acceptable sources for future requirements at Brook Army Medical Center as they arise; however, any new items would need to meet all of the Brook Army Medical Center's requirements.

8. As the Contracting Officer, I hereby certify that the information contained in this justification is accurate and complete to the best of my knowledge and belief.

DANIEL LINK / DATE
CONTRACTING OFFICER

I hereby certify that the requirements which form the basis of this justification are accurate, that these supplies meet the Government's minimum needs, and that this justification is accurate and complete to the best of my knowledge and belief.
