The item(s) to be repaired are complex and must meet critical operational and reliability requirements, the achievement of which require unique production techniques and extensive and/or sophisticated testing. The Government does not own or possess any rights to the technical data, specifications, and drawings required to repair these item(s) and it has been determined that it is uneconomical to purchase them. These item(s) are the only ones approved by the USCG's Aircraft Configuration Control Board for use on the MH-60T helicopter.
