

Statement of Work
ZVA-50 Vector Network Analyzer Repair

Requesting Laboratory / Division / Group:

Communications Technology Laboratory
Radio Frequency Technology Division
Radio Frequency Fields Group (672.02)

I. BACKGROUND:

The National Institute of Standards and Technology (NIST) Communications Technology Laboratory (CTL) enables science and industry by providing essential measurement methods, instrumentation, and standards to support all phases of communications technology development.

As part of this effort, the RF Technology Division of the Communications Technology Laboratory provides antennae calibration services to private and public agencies. To pursue these activities, the RF Technology Division requires repair and calibration of a Rohde and Schwarz Vector Network Analyzer.

II. PURPOSE:

Repair and calibration of Government owned Vector Network Analyzer

Place of Performance:

Vendor's Facilities

Regular Business Hours:

Regular business hours are Monday through Friday, 8:00 am to 5:00 pm Local Time, excluding Federal holidays and NIST closures.

Delivery Date:

21 days After Release of Order

III. SPECIFIC REQUIREMENTS:

Task 1 Repair and Calibrate Instrument

-

The contractor shall:

- 1.1 Repair of the product
- 1.2 12-months warranty on the entire product
- 1.3 Measurement of complete product specifications with the same procedures as used in production (including measurement uncertainties and guardbanding)
- 1.4 Documentation of calibration results upon receipt
- 1.5 Adjustments to optimize the product parameters to after production condition when needed and documentation of the after-adjustment product parameters

- 1.6 Calibration certificate including Statement of Compliance
- 1.7 ISO 9001 certified (and in line with ISO 17025)
- 1.8 Preventive maintenance and performance modifications

IV. GENERAL REQUIREMENTS

Government Furnished Property

All property, data and information provided by the Government in the performance of this task remains the property of the Government and shall be surrendered to the government upon completion or termination of this requirement.

Item: Vector Network Analyzer
Model Number: ZVA-50
Serial Number(s): 100127

Inspection and Acceptance

In addition to the inspection and acceptance terms articulated in the specific FAR clause that allows the Government reserves the right to perform such performance tests and evaluations as defined below to verify specified system performance. Such tests and evaluations, if performed, shall be conducted within the environment that the system is to be operated. The Contractor has the right to be present during the tests and evaluations, if performed, at the Contractor's expense.

Performance Tests:

Test	Description	Standard
1	Power Calibration	OEM Calibration Kit Standards
2	Electrical Calibration	OEM Calibration Kit Standards

NIST may choose at its discretion to forego this part of acceptance testing.

A visual inspection of the equipment will be performed by the NIST POC to identify surface defects or any form of indication that any equipment was damaged during transport to NIST. The Government shall have sole discretion to require repair or replacement of damaged and/or nonconforming supplies at no cost to the Government. The Government at any time prior to acceptance shall reject the equipment due to defects and/or nonconformance. The vendor is responsible for latent defects discovered any time after final inspection. However, the extent of its liability shall be prorated over the useful life of the equipment.

The Government will test, inspect, and accept or reject the equipment within 7 days of the receipt of the equipment unless otherwise indicated above. The Government reserves the right to conduct quality assurance testing to confirm that a given instrument(s) meets the manufacturer's and/or the Government's performance specifications. It is anticipated that the equipment will meet all manufacturer's specifications

and/or the Government’s performance specifications identified in the most recent operations and maintenance manual for each piece of equipment and/or in this document.

V. Schedule Of Deliverables:

Deliverable	Description	Due Date	Quantity
1	Repair and Calibrate Instrument	Not later than 21 DAYS after receipt of order	1
