

Statement of Work

1 COMFRC Mission

To produce quality airframes, engines, components and support equipment and provide service that meet the Naval Aviation Enterprise's aircraft ready-for-tasking goals with improved effectiveness and efficiency.

- 2 Requirement Background: Without the maintenance/service there will be no support for the Leica Laser Portable Trackers or Coordinate Measuring Machines(CMM) and associated probes. The requested renewal ensures support and functionality of Leica Laser Portable Trackers, CMMs, and associate probes used to perform precision measurements and to dimensionally verify aircraft parts and fixtures to blueprint specifications as well as perform First Article Inspections and Engineering Investigations on all aircraft platforms at FRCE. A Work Stoppage on the Leica Laser Portable Trackers, CMMS, and associated probes could result in aircraft on the ground awaiting parts or the use of a fixture that could delay aircraft repair to produce fit-form test articles tooling to manufacture components within the sheet metal shop and fixtures.

MyCare Enterprise Level services for the AT402 w/ B Probe and AT960-LR (long range) coverage.

MyCare Essential - annual preventative maintenance, certification, discounts parts labor and rental loaner equipment and even covers return shipping in the event necessary.

MyCare Premium - includes everything in MyCare Essential with a guaranteed 3-day turnaround time for both covered service and annual recertification or a loaner device will be provided free of charge. It also includes onsite support, troubleshooting to keep your portable system up, and running at all costs.

MyCare Enterprise includes everything in MyCare Premium adding expedited shipping both ways (to and from the service center) for both covered service and annual recertification. It also includes loaner equipment shipped next business day for covered services including annual recertification. MyCare Enterprise provides onsite support scheduled within the next business day for any troubleshooting that cannot be handled remotely.

Contract Requirements: The contractor shall provide a one (1) year Hexagon MyCare Hardware Preventative Maintenance & Calibration Agreement/Service Subscription & Parts Blanket associated with (7) Leica Laser Portable Trackers and Probes, and twelve (12) CMMs in support of the Precision Measurement Center at Fleet Readiness Center East (FRCE).

3

3.1 CLIN 0001: Stationary Hardware Add-On.

3.2 CLIN 0002: Stationary Parts Blanke.

3.3 CLIN 0003 Portable Hardware Add-on.

- 3.7 CLIN 1003: Portable Hardware Add-On
- 3.8 CLIN 1004: Portable Parts Blanket.
- 3.9 CLIN 2001: Stationary Hardware Add-On.
- 3.10 CLIN 2002: Stationary Parts Blanket.
- 3.11 CLIN 2003: Portable Hardware Add-On.
- 3.12 CLIN 2004: Portable Parts Blanket.

4 Additional Requirements:

MyCare Premium Services Subscription includes the following:

- Annual Calibration/ Certification - Major adjustments to the compensation of the machine, certify the machine to OEM or Customer Specification. Adjustment to Pitch, Yaw, Roll Points, Vertical and Horizontal Straightness points, and Linear are considered major adjustments.
- Annual Preventative Maintenance – multi-point inspection performed at time of service on an as-needed basis, may to include
 - Inspect the machine for Damage. Note any shiny spots or scratches on the bearing paths (Indicates bearing wear)
 - Inspect the airlines for discoloration or deposits.
 - Inspect the air filtration system.
 - Inspection of scales and rails.
 - Remove the Covers.
 - Encoder alignment and tune up.
 - Cycle machine, check motor function, tune servo amplifiers if necessary.
 - Check mechanics and/or air pressure of counterbalance.
 - Check the functionality of all emergency stops and crash protection.
 - Check probing equipment for visible damage, rotate wrist in both “A” and “B” angles (via keypad and DCC) and square the head to the machine.
 - Check cabling and connections for damage or wear.
 - Check operation of cooling fans in controller.
 - Clean fan filter on controller.
 - Check general cleanliness of controller.
 - Check the operation of a jog box and joystick.
 - Check in-line air filters and check the machine for the correct air pressure setting.
 - Wipe down machine covers and computers.
 - Check hardware and software limits.
 - Check for machine certification expiration.
 - Check qualification sphere certification expiration.
 - Review and document revision levels. Update only when necessary.

- Repair Labor Coverage - coverage of Hexagon's service engineers labor needed for repair services of the System. Does not include rigging or rental of equipment.
- Parts Coverage - coverage for ordinary wear and tear of parts.
 - Probe interface components are included in parts.
 - Excluded from parts coverage:
 - Air hoses
 - Probe components, including Styli, wrists and sensors, and racks
- Major Machine Components –coverage for defects in Major Machine Components limited to the following: Motors, belts, lift cylinder, air bearing, scales, encoder system and controller. Coverage for chassis and bearing ways, Z Rail, Bridge, isolators (if applicable), in the event there is a documented factory defect.
- Service Parts Coverage - parts used by a Hexagon Service Engineer when on site.
- Travel Charges - included at no additional charge for:
 - The annual certification and preventive maintenance visit.
 - Any additional certification or calibration Services under the applicable MyCare Subscription.
 - Any repair labor under the applicable MyCare Subscription
- MyCare Rewards - discount schedule for other products and services from Hexagon Manufacturing Intelligence. To be eligible, Customer must be covered by MyCare Subscription and in good standing at the time of using MyCare Rewards. The level and mix of Rewards will be adjusted annually and we will provide a custom offering to our Enterprise accounts.
 - 25% off SFx Asset Management PR - SFx Asset Management lets operators and managers keep a close check on systems by providing real-time customizable notifications of the performance and status of metrology assets including coordinate measuring machines (CMMs) and laser trackers. Data aggregated by SFx Asset Management PRO can be used to pre-emptively schedule maintenance and identify sources of downtime. In 2021, the first year of SFx PRO subscription will be included with any new CMM. If you have existing equipment, MyCare Subscription entitles you to a 25% discount for purchase as part of MyRewards.
- Trade-In Value Lock Credit - credits towards purchase of a new Hexagon MI CMM system. Customer will start earning credit towards a new machine in year-one of coverage. Customer will start earning credit towards a new machine in year-one of coverage. Under MyCare Essential Customer will earn 0.5% (1% under Premium, Enterprise and Legacy) per Subscription year towards a new Hexagon CMM system for every year of continuous coverage (e.g., continuous MyCare coverage for ONE CMM System will earn Customer a 5% (10% under Premium, Enterprise and Legacy) discount after 10 years of coverage towards ONE new CMM system). Credit earned is capped at and will not exceed \$6,000 (\$12,000 under Premium, Enterprise and Legacy). Multiple machines credits cannot be combined with a single aggregate discount. If Customer trades in the existing system, additional credit may be applied depending on size, configuration, age and condition of the machine. Any gap or discontinuance in MyCare Coverage Subscription will result in the credit resetting to zero

Parts Blanket includes the following

- Emergency repair and replacement parts associated with CMMs that would not be covered under the MyCare Premium Services, such as repairs induced by operator error, abuse, negligence, or adverse environmental conditions.
- Repairs/parts not covered under the MyCare Premium Services will be covered under this agreement and based on factory specifications.
- Prior to performing repairs, written recommendation and approval will be provided and obtained from one of the listed Support Coordinator, Technical POCs. This will ensure the equipment is running with minimal downtime and at optimum condition/performance.

The CMMs covered under the " MyCare Hardware Add-On Premium Subscription & Parts Blanket " include:

Machine Serial #	Machine Type	Location	Asset #
PMC579GA	Leitz Ultra 12106	Bldg. 4225	65923097192
