

Hello,

The CECOM recompetes for Worldwide Field Support is actively being worked towards a draft Request for Proposal;(RFP) to send out to all interested parties via SAM.GOV. At this time, we are not holding any meetings or answering additional questions. An Industry Day with the Technical teams from SEC and TYAD is anticipated in the near future. Once a date is established, a notice will be sent via SAM.GOV with the necessary information.

We kindly request that you hold all questions until after the release of the draft RFP and Industry day.to ensure we have ample time to cover address them.

We're eager to hear your questions and value your input. Thank you for the continued interest in the program.
