Justification and Approval (J&A) for Other Than Full and Open Competition

Was a J&A approved for the preceding acquisition where that acquisition required a J&A? ☐ Yes ☒ No

Is this a new or amended J&A Document? ☒ New ☐ Amended (Prior to Award Only!)

Is this a Bridge Action as defined at [DAFFARS 5302.101](#)? ☐ Yes ☒ No

Dollar Value of this Acquisition: ☐ [REDACTED] ☒ [REDACTED] ☐ [REDACTED] ☐ [REDACTED]

Contracting Activity: AFLCMC/ROMK

Purchase Request (if available) / Local ID Number: 25M-332A-FO

Program / Project (and PE, if applicable): AFLCMC/ROM (AFMETCAL)/25M-332A-FO: GEC MD8060 Manual Upgrade

Program Type (PEO, Enterprise, of Operational):

Authority:

6.302-1 – 10 USC 3204(a)(1), Only One Responsible Source - No Other Supplies or Services Will Satisfy Agency Requirements

Estimated Contract Cost (including options): [REDACTED] J&A Type: ☐ Class ☒ Individual

COORDINATION ([DAFFARS 5306.304\(a\)](#))

Date 14 Feb 2025	[REDACTED] [REDACTED] [REDACTED]	Signature [REDACTED] [REDACTED]

Justification and Approval (J&A) for Other Than Full and Open Competition

I. Agency and Contracting Activity.

AFLCMC/ROM: Air Force Metrology and Calibration Program (AFMETCAL), 813 Irving-Wick Drive West, Heath OH 43056-1199

II. Nature and/or description of the action being approved.

This J&A is for a new, sole-source, firm-fixed price contract. AFMETCAL has a requirement to upgrade 48 General Electrodynamics Corp (GEC) MD8060-00000-10 Automated Scale Presses that are used by the Air Force Precision Measurement Equipment Laboratories (PMELs) to maintain measurement traceability for aircraft and vehicle platform scales.

III. Description of supplies/services required to meet agency needs.

All 48 GEC MD8060-00000-10 Automated Scale Presses are to be upgraded to manually controlled systems. This includes replacing the Hydraulic Power Unit, Electronic Control Assembly, Laptop Controller, and Software with a manually controlled hydraulic hand pump. The system shall maintain it's original performance requirements of 0.025% rdg and a range of 60,000 lbf. The goal of this upgrade is to eliminate downtime due to software and electrical hardware failures and also reduce the probability of damaging standard load cells from overload. Nearly all reliability and overload issues are caused by failure of the Hydraulic Power Unit, poor software design, or poor quality cable construction. The contract CLIN structure will not include separately priced CLINs for intellectual property (IP) and IP rights because GEC states the information is proprietary and will not sell them.

Quantities to be purchased are 48 units over 5 years, starting in FY25, using 3080/Investment funds at a total estimated price of [REDACTED]. All items include a 3 year warranty. Required delivery rate is a minimum of 2 units per month. Delivery begins 90 days after contract award.

Year	Qty	Est Unit Price	Est FY Total Price	Description
FY25	[REDACTED]	[REDACTED]	[REDACTED]	Full Production
FY26	[REDACTED]	[REDACTED]	[REDACTED]	Option
FY27	[REDACTED]	[REDACTED]	[REDACTED]	Option
FY28	[REDACTED]	[REDACTED]	[REDACTED]	Option
FY29	[REDACTED]	[REDACTED]	[REDACTED]	Option
FY25-29	[REDACTED]	[REDACTED]	[REDACTED]	Disposal
Total	48	[REDACTED]	[REDACTED]	

IV. Demonstration that the contractor's unique qualifications or the nature of the acquisition requires use of the authority cited above.

GEC is the manufacturer of the MD8060 and they state that the technical data for the hydraulic system is proprietary. The system consists entirely of COTS items which were developed at GEC's private expense, and found in the broad marketplace with no difference between Government and commercial requirements. GEC is not willing to sell the technical data for the hydraulic system. The new manually controlled hydraulic hand pump will need to integrate with the existing hydraulic ram and plumbing on the system. The technical data for the hydraulic ram and plumbing needs to be available for any other contractor to perform the upgrade. Due to the proprietary nature, GEC is the only contractor capable of meeting USAF requirements. No other contractor would be able to meet AFMETCAL's requirements without access to the technical data for the hydraulic system.

AFMETCAL has determined that award to any other source would result in substantial duplication of cost to the Government that is not expected to be recovered through competition. A Full & Open procurement strategy to completely replace the GEC MD8060 would cost [REDACTED] which makes pursuing this strategy a substantial duplication of cost. This analysis was completed by AFMETCAL using price estimates from potential contractors.

Accordingly, GEC is the only firm capable of providing the supplies and services described in the paragraph above without the Government experiencing substantial duplication of cost that could not be recovered through competition. Therefore, this acquisition will allow the continued use of highly specialized equipment without having to replace the entire system.

Justification and Approval (J&A) *for Other Than Full and Open Competition*

V. Description of efforts made to ensure that offers are solicited from as many potential sources as practicable, including whether a notice was or will be publicized as required by subpart 5.2 and, if not, which exception under FAR 5.202 applies.

The MD8060 was procured in 2019 under contract number FA226319CA025. This procurement was conducted with Full & Open competition. A RFI for this procurement was issued on May 29, 2024 and closed July 1, 2024 and received no replies. A Notice of proposed Contract Action (NOCA) IAW FAR 5.201 will be issued.

VI. Determination by the Contracting Officer that the anticipated cost to the Government will be fair and reasonable.

Based upon pricing data provided in the offeror's price estimate, the contracting officer expects they will be able to determine that the anticipated cost to the Government will be fair and reasonable. Price Analysis is based on comparison to the Government estimate, current price lists, and historical buys per FAR 13.106-3(a)(2).

VII. Description of the market research conducted and the results, or a statement of the reasons market research was not conducted.

Market Research, in accordance with FAR Part 10, was conducted by posting a Sources Sought on 29 May 2024. The sources sought was released with a draft PD and did not receive any responses. AFMETCAL also met with other OEMs to assess the possibility of an upgrade, but determined this route to not be possible without the proprietary data. Based on market research results, no other vendor besides GEC was found to be able to offer the product that meets the AF requirement.

VIII. Any other facts supporting the use of Other Than Full and Open Competition.

All supporting facts of this J&A have been listed in the above sections of the document.

IX. List of any sources that expressed, in writing, an interest in the acquisition.

Morehouse Instrument Company was contacted as a part of the Market Research because they build hydraulic power units for their own commercially produced Automated Scale Presses. AFMETCAL was interested if their hydraulic power units could be integrated into the GEC MD8060. Morehouse initially expressed interest in the acquisition, however after meeting with their engineering team, it was determined that their hydraulic power unit is not compatible with the GEC system. Even if they were supplied the proprietary technical data, they do not have a COTS solution.

X. A statement of the actions, if any, the agency may take to remove or overcome any barriers to competition before any subsequent acquisitions for the supplies or services required.

The Air Force will continue to monitor the marketplace for future acquisitions of the supplies or services being acquired.

XI. Certification by the Contracting Officer.

As evidenced by their signature, the contracting officer certifies that this justification is accurate and complete to the best of their knowledge and belief.

XII. Certification by the technical/requirements personnel.

As evidenced by their signatures, the technical personnel have certified that any supporting data contained herein, which is their responsibility, is both accurate and complete.

Justification and Approval (J&A) *for* Other Than Full and Open Competition
