

Statement of Work (SOW)

2025 Fermi Summer School Workshop

1. Background

The Fermi Summer School is an annual scientific workshop designed to enable collaboration between early-career researchers and experts in gamma-ray astrophysics data analysis and techniques that support the objectives of NASA's Fermi Mission. This event enhances the scientific productivity of NASA's Fermi user community by providing participants with hands-on experience, expert guidance, and collaborative opportunities to develop research projects using Fermi data.

The 2025 Fermi Summer School will be hosted by the University of Delaware, which serves as the primary event organizer and determines the final workshop location.

2. Scope

The vendor shall provide facilities and associated support services necessary to host the 2025 Fermi Summer School Workshop. This includes classroom-style meeting spaces, breakout areas, technological resources, and outdoor areas suitable for astronomical demonstrations.

3. Period of Performance

The required services shall be provided from **May 27 to June 6, 2025**.

4. Requirements

The vendor shall provide the following:

4.1 Meeting and Workshop Facilities

- One (1) **classroom-style meeting room** capable of accommodating up to **35 participants**.
- **Breakout meeting spaces** near the main meeting room for small group discussions and collaborative work.

4.2 Technology and Connectivity

- **Wireless internet access** with sufficient bandwidth to support all attendees.
- **Power connections** for attendees' laptops and other electronic devices.
- **Audio/visual presentation equipment**, including an overhead projector, screen, and sound system.
- **Whiteboards and/or blackboards** with markers and erasers for instructional use.

4.3 Specialized Outdoor Space for Astronomy Demonstrations

- Access to an **open, dark site** suitable for astronomical observing using portable optical and muon telescopes.

5. Deliverables

The vendor shall ensure the availability and functionality of all required facilities, equipment, and services throughout the event duration. Any issues affecting performance shall be addressed promptly to avoid disruption to the workshop.

6. Place of Performance

The workshop will be held at a location determined by the University of Delaware. The vendor's facilities must meet all stated requirements.

7. Government Furnished Information (GFI)

NASA and the University of Delaware will provide the agenda, research materials, and instructional content for the workshop.

8. Performance Standards

The vendor shall ensure:

- Facilities are set up and operational before the event start date.
- Internet and power connections are functional throughout the event.
- A/V equipment is tested and ready before each session.
- Outdoor spaces are suitable for nighttime astronomical observations.
