Request for Information

Solicitation Number: RFI-DIV-07-LABORATORY

Please note, this is not an Order

1. What type of ribbon do we use to print on the zebra printer? Are they wax, full resin, or wax-resin?

The box says Wax thermal transfer ribbon. It does not list if it is resin or not.

2. Do the label samples need to be the exact size requested? Or can the label samples be preprinted strips to show material validity?

Yes, there are very distinct boxes these labels need to go in on our forms. They also need to be this size to fit on the cassette that holds the sample.

3. Can we send multiple materials to be reviewed?

Yes, this is up to the vendor and at no cost to the Government.

4. Does our response need to have any specific heading or completed on any specific form? Or should we just add pages to the RFI provided on the listing?

Please include the RFI number on all responses (RFI-DIV-07-LABORATORY).
Responses/capability statements can be submitted using company letterhead.

5. Would the sample rolls of 2,000 be OK for your evaluation?

Yes, 2K would be ok.

6. What is the annual usage of this product?

Approximately 1700 rolls of 3K labels a year.
