- No PALT in December due to I/ITSEC 1-4 Dec 2025

*Tentative Event schedule

Hybrid sessions (in-person attendance and virtual participation via MS TEAMS)

Time: 1100 – 1200 EST

Monitor <https://sam.gov> for updates and RSVP instructions for each session.

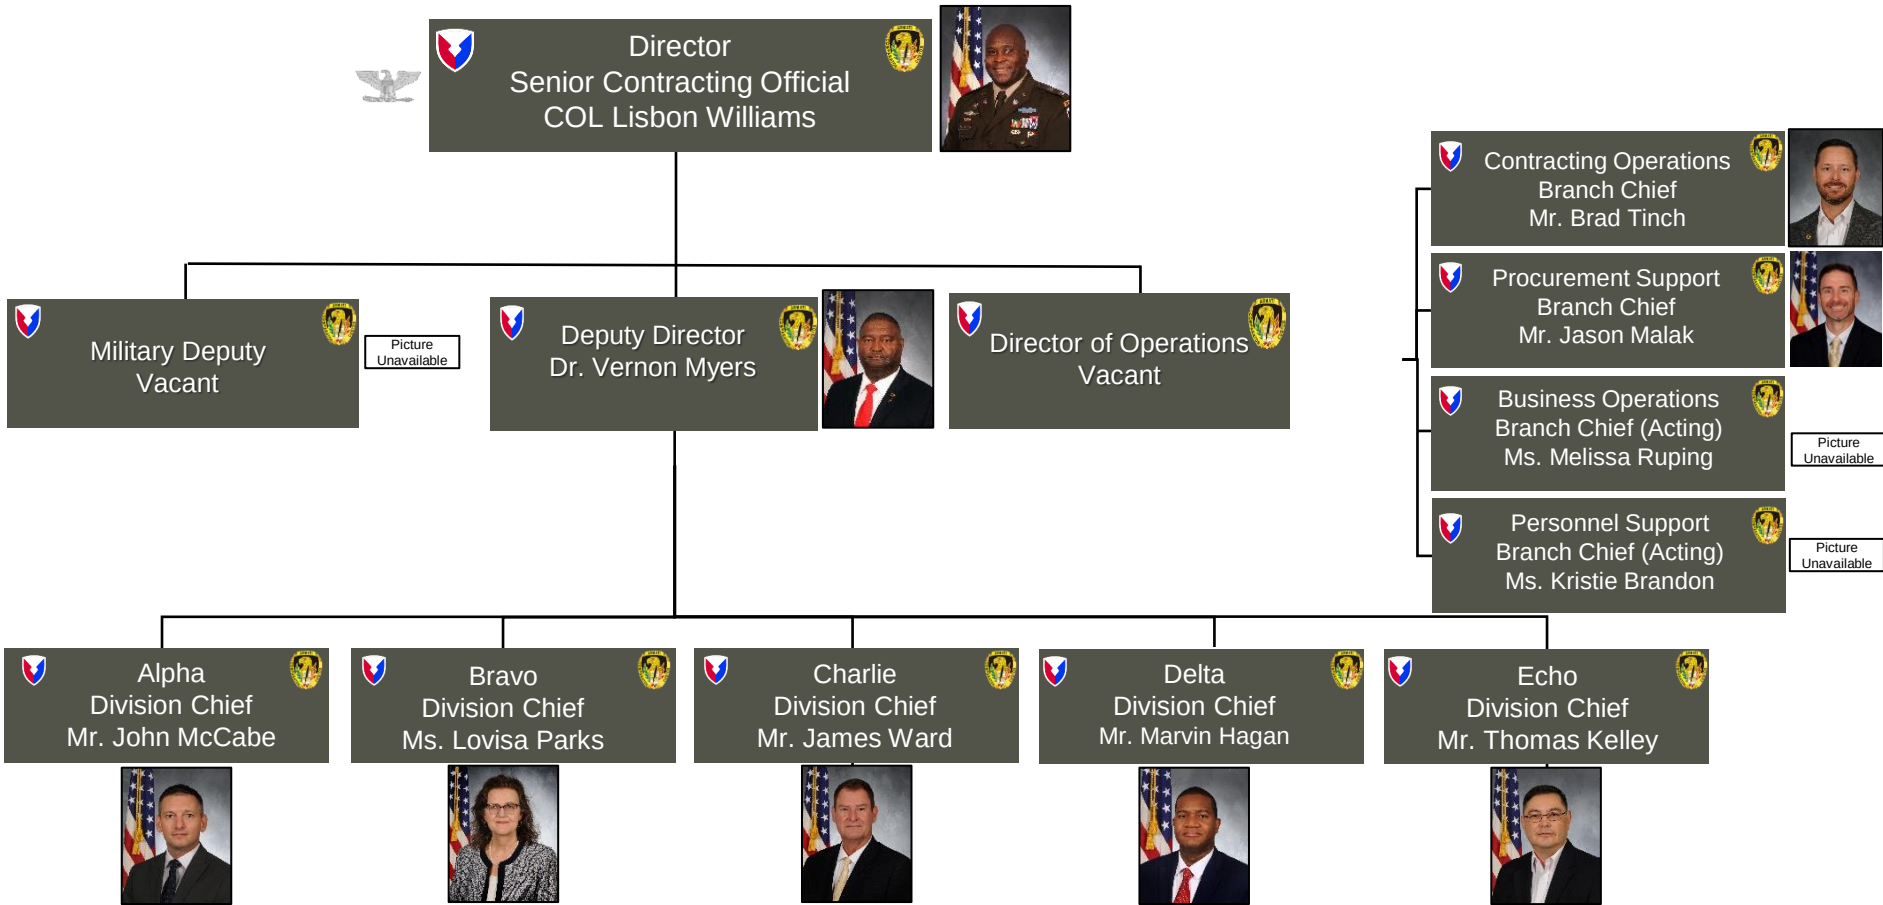

Next PALT Session Information

- ACC-Orlando WILL host a hybrid PALT Update Session on 8 April 2025
- PEO-STRI will host their next TECH Exchange on 13 May 2025 from 1100-1200.
- To attend, individuals must register in advance via the notification located on the SAM.gov website.
- Registration for the 8 April 2025 PACC-ORL PALT opens on 12 March 2025.
- You may submit questions in advance using a link provided in SAM.gov.
- The link for registration and submitting questions will close on 21 March 2025.
- **We require a specific & complete question identifying the program name, do not simply list a program acronym or name.** This facilitates ACC-ORL providing focused and accurate answers. We will first address the questions we received in advance, then open the floor for questions.

Bridge to Evolutionary STE TESS Multiple Award Contract (BEST-MAC)

The work to be performed under this contract will consist of:

- Procurement of new TESS to support new vehicle platforms and any requirements resulting from Army stationing decisions
- Support Service Life Extension for TESS product lines
- Tech refreshing TESS product lines to interface with STE Live
- Tech refresh TESS product lines to install new hardware and software
- Tech refresh TESS product lines with Live Training Engagement Composition (LTEC) updates
- Tech refresh TESS product lines with multi-national interoperability updates
- Lot 1 - Modify existing TESS to extend product life and meet the Army's evolving requirements. The focus of Lot 1 is to provide Service Life Extension Programs (SLEP) to existing TESS.
- Lot 2 - Procure new modernized TESS. Lot 2 will focus on Army Force Structure changes and modernization of the current TESS and insertion of STE Based TESS. Lot 2 will include systems that must be replicated through procurement instead of SLEP.

Family of Maintenance Trainers (FMT) Product Line (PL)

- FMT PL will utilize a Government owned architecture and a common software and hardware baseline (Common Core) to provide fault diagnosis, troubleshooting, repair removal and replacement maintenance task training for multiple military platforms.
- FMT PL is comprised of the Common Core, Diagnostic Troubleshooting Trainers (DTTs), Part Task Trainers (PTTs), and Hands On Trainers (HOTs).
- FMT PL provides efficient, effective, and agile processes to accomplish production, tech refresh, cybersecurity, fielding, obsolescence management, concurrency, upgrades, and disposal of legacy and obsolete hardware.
- FMT PL eliminates duplication across development and sustainment efforts, establish a common software and hardware baseline across the product line, and promote maximum reuse of existing systems/subsystems.

Note: All Dates are Tentative

PdM CRT Topic: Persistent Cyber Training Environment (PCTE) Cyber Innovation Challenge (CIC) #5

Objective

- Decrease **Time** to Produce and Present Training
- Increase Training **Quality**

Problem Statement

New requirements are being introduced by USCYBERCOM for the CIC5 effort identifying the need for Artificial Intelligence (AI) enabled cyber capability that can emulate the training environment.

Vision

Provide a highly advanced PCTE platform that enhances the user experience while minimizing the need for direct human involvement. By incorporating human-centric tasks, the platform could leverage advanced technologies such as advanced user emulation, automated help desk functions, user document creation, and resource utilization prediction to create a seamless experience. This will lead to a more efficient, user-friendly platform that enhances productivity, while reducing the workload on human operators.

ACQUISITION STRATEGY

- PdM CRT in support of the PCTE is pursuing CIC #5 for FY26 award
- We are seeking to enhance and address PCTE training platform needs through a continued multi-vendor best-of-breed integrated capability
- Capability gaps are currently being assessed by USCYBERCOM and the program office

CURRENT CONTRACT/ORIGINAL DEVELOPER/OEM (IF RECOMPETE)

- Current contract does not exist. Future contract will be an OTA with industry
- Initial RFS will include paper submission of Artificial Intelligence (AI) Concept of Operations, Technical Data Package, System Architecture.

PdM CRT Topic: Persistent Cyber Training Environment (PCTE) Capability Market Research

Objective

- Decrease **Time** to Produce and Present Training
- Increase Training **Quality**
- Affordable Scalable Solutions

Market Research

PdM CRT is currently conducting market research of cyber range development software application capabilities. This Software Product must meet minimum integration with existing PCTE platform to support individual and collective training. Additional technical features include cyber-security, user friendliness, hypervisor-agnostic, Technical Architecture (support for virtualization servers, a control plane for management and event planes for cyber training sessions, and experiments), Cloud compliant and licensing cost. Industry is invited to provide software product capability description, product literature and technical data sheets to support the initial phase of market research.

ACQUISITION STRATEGY

- We are conducting market research to enhance and address PCTE training platform needs and affordability concerns through a continued multi-vendor integrated capability

DIR IMO Topic: Test Resource Management Center (TRMC) Test & Evaluation (T&E) Science & Technology (S&T) Program

T&E/S&T Program sponsors projects with Technology Readiness Levels (TRLs) 3-6. The T&E/S&T Program will accept a high degree of technical risk to fund innovations that could result in high-payoff technological advancements. The T&E/S&T Program will consider novel, unproven solutions that are deemed too risky to be adopted in current DoD T&E approaches.

New Test Technology Focus Areas:

- High Speed Systems Test (6 topics)
- Directed Energy Test (5 topics)
- Autonomy and Artificial Intelligence Test (3 topics)
- Spectrum Efficiency Test (1 topic)
- Nuclear Environments Test (2 topics)

PdM FTS Topic: Special Operations Forces Training, Engineering, and Maintenance Support IV (SOF TEAMS IV)

SOF TEAMS IV

- Supports the 160th Special Operations Aviation Regiment (SOAR) located at Ft. Campbell, KY.
- SOF TEAMS IV provides maintenance and support for the 160th SOAR training operations to the Combat Mission Simulators (MH-47G, MH-60M, A/MH-6) and related Training Aids, Devices, Simulators and Simulations (TADSS).
- Tasks include scheduled and unscheduled maintenance, repair, supply support, transportation, hardware/software engineering support, site operations support, and operational support of training equipment.
- Operations and maintenance tasks will employ a mix of firm-fixed price and cost-plus-fixed-fee CLINS for the base year with four one-year options.
- Contract will have the scope to support 160th SOAR(A) at CONUS locations other than Ft. Campbell, KY (if required).

ACQUISITION STRATEGY

- Full and Open Competition
- Single-award C-Type contract, managed by PdM FTS
- CLINs consisting of Firm-Fixed Price (FFP) and Cost Plus Fixed Fee (CPFF)

Next Generation Constructive (NGC) Acceleration

The Army’s Synthetic Training Environment (STE) Next Generation Constructive (NGC) is the future of constructive training for Corps level capability. NGC will enable the Army to close command staff training gaps against near-peer threats within a Multi-Domain Operations (MDO) environment scaled through the Army Service Component Command (ASCC) level. This seamless delivery of NGC is built off the STE Software (SW) foundation to achieve Army training readiness needs.
