WASHINGTON NAVY YARD DC 20376-0001

IN REPLY REFER TO

J&A No.: 50,635
Code 0231

**JUSTIFICATION AND APPROVAL
FOR USE OF OTHER THAN FULL AND OPEN COMPETITION**

1. Contracting Activity

The Naval Sea Systems Command (NAVSEA) Naval Surface Warfare Center, Corona Division.

2. Description of the Action Being Approved

Establishment of a Bridge Contract using other than full and open competition to Science Applications International Corporation (SAIC), 12010 Sunset Hills Road, Floor 4, Reston, VA 20190 (CAGE: 6XWA8). This Bridge Contract will be a Cost-Plus-Fixed-Fee (CPFF) contract with an estimated value of \$2,269,572. This Bridge Contract will provide continuation of services in support of the NAVSEA Supervisor of Shipbuilding, Conversion and Repair (SUPSHIP) Management (SEA 04Z) activities to ensure compliance with cybersecurity requirements from the expiration of the current Task Order, N0017804D4143/N0017419F3001, on 16 February 2025 until award of the competitive follow-on SeaPort-NxG Task Order planned for 30 June 2025.

3. Description of Supplies/Services

The Government has a requirement to provide uninterrupted information technology engineering and support services to maintain and extend functionality of the Technical Support Management (TSM) Suite, consisting of the TSM application and the Electronic Trial Cards (ETC) application in support of SEA 04Z to maintain and improve the collection and reporting of shipbuilding data collected by SUPSHIP. The subject sole source procurement will provide the continuation of the same support services to the aforementioned SEA 04Z mission.

This Bridge Contract will be a CPFF contract with an estimated value of \$2,269,572. The total Bridge Contract will include a six and one half (6.5) month PoP (17 February 2025 – 31 August 2025).

Based upon the projected requirements and budget forecasts, the Government plans to incrementally fund the contract with Operations and Maintenance, Navy (O&M,N) as shown below.

Estimated Dollar Value

	FY25 Total
O&M,N	\$2,269,572
Total	\$2,269,572

SEA 04Z utilized historical data and projected minimum requirements to estimate and provide the minimum effort required. The minimum requirements have been verified by the certifying technical and requirements personnel.

4. Statutory Authority Permitting Other Than Full and Open Competition

10 U.S.C. §3204(a)(1), Only one responsible source and no other supplies or services will satisfy agency requirements.

5. Rationale Justifying Use of Cited Statutory Authority

Pursuant to 10 U.S.C. 3204, as implemented by FAR 6.302- 1(a)(2)(iii)(B), allows an agency to restrict competition when services are deemed to be available only from the original source. In the case of a follow-on contract for the continued provision of highly specialized services, when it is likely that an award to any other source would result in unacceptable delays fulfilling the agency's requirements.

The support services described are currently covered under a competitively procured SeaPort-NxG Task Order awarded to SAIC will exhaust available ceiling on 16 February 2025. Steps are already underway for a follow-on competition to secure a new follow-on Task Order. The estimated award date for the new competitive award is expected to occur after the expiration of the current Task Order, leaving a gap that would result in an interruption of services.

If this Bridge Contract action is not executed to ensure continuation of technical support services by incumbent SAIC for SEA 04Z and the naval maintenance community, an unacceptable delay resulting in a gap in support services will be experienced.

SAIC is the only responsible source capable of fulfilling the Navy's requirement for specific system sustainment and support services of the TSM Suite without delays to operations or degradation in quality of services. TSM is a web-based Enterprise Content Management (ECM) system used across all SUPSHIPS for various tasks, with shipbuilders integrated into the workflows. TSM functions as the overall repository for Quality Assurance, Engineering, and Project Office data. The system enables paperless data collection and workflow management, specifically for trials, inspections, and certifications, including functions for Board of Inspection and Survey (INSURV) Acceptance Trials (AT), Special Trials (ST) and Final Contract Trials (FCT). TSM generates 100% of Trial Cards at sea via the ETC, supporting hierarchical workflows and conferences at sea and ashore.

Awarding this requirement to another contractor would lead to unacceptable delays in fulfilling NAVSEA's requirements to provide secure and stable information technology tools to all SUPSHIPS and detachments, Naval Surface Warfare Centers, NAVSEA Program Executive Offices (PEO), to include PEO Aircraft Carriers, PEO Columbia, PEO Ships, PEO Submarines, and PEO Unmanned and Small Combatants, as well as the Coast Guard, Ship Builders, and various technical support groups. SAIC is performing program management support, system and database administration, incident analysis and triage, defect correction, cyber security support, data migration and validation, software deployment, system integration, infrastructure and installation, and system testing for both TSM and ETC. SAIC is also completing code correction

and integrating activities to support COMPASS and APEX databases, a critical analytical initiative for the ship building and maintenance community.

Absent the support services covered in this J&A, the Government would not be able to operate the critical suite of digital tools required for data collection and workflow management, specifically for trials, inspections, and certifications, including functions for INSURV AT, ST and FCT. The Navy's ability to provide current Quality Assurance, Engineering and Project Office data used for AT, ST and FTC would be negatively impacted, ultimately delaying critical Fleet operational schedules and adversely effecting mission readiness.

Therefore, based on the aforementioned information, the adverse schedule impacts justify the use of other than full and open competition.

6. Description of Efforts Made to Solicit Offers from as Many Offerors as Possible

Per FAR 5.2, the proposed Bridge Contract was synopsisized via SAM.gov during a period of 15-days (26 December 2024 – 10 January 2025). No responses have been received to date. No additional market research will be conducted, because it is not practicable, for reasons discussed in Paragraph 5 above, for any company other than SAIC to provide the required services during the bridge period. A blanket waiver was issued by NAVSEA Director of Contracts (SEA 02) on 15 September 2015 waiving the requirement found in DFARS PGI 206.302-1(d) to issue an RFI or Source Sought Notice (SSN) when awarding a bridge contract on the basis found in FAR 6.302-1.

7. Determination of Fair and Reasonable Costs

The Contracting Officer has determined the anticipated cost to the Government of the supplies/services covered by this J&A will be fair and reasonable.

8. Actions to Remove Barriers to Competition

There are no known barriers to competition as evidenced by the fact that the follow-on SeaPort-NxG solicitation resulted in effective competition.

CERTIFICATIONS AND APPROVAL

TECHNICAL AND REQUIREMENTS CERTIFICATION

I certify that the facts and representations under my cognizance which are included in this Justification and its supporting acquisition planning documents, except as noted herein are complete and accurate to the best of my knowledge and belief.

TECHNICAL COGNIZANCE:

[REDACTED]

REQUIREMENTS COGNIZANCE:

[REDACTED]

LEGAL SUFFICIENCY REVIEW

I have determined this justification is legally sufficient.

[REDACTED]

CONTRACTING OFFICER CERTIFICATION

I certify that this justification is accurate and complete to the best of my knowledge and belief.

[REDACTED]

APPROVAL BLOCK (FAR 6.304 for Approving Official)

Upon the basis of the above justification, I hereby approve, as Designee of the Head of the Contracting Activity, the solicitation of the proposed procurement(s) described herein using other than full and open competition, pursuant to the authority of 10 U.S.C. 3204(c)(1).

Kristine R. Boyles, Director of Contracts, SEA 02
