FAR PART 8.405-6

Acquisition Plan Action ID: 36C247-25-AP-1467

(1) Contracting Activity:

Department of Veterans Affairs, Network Contracting Office (NCO) 7, located at 325 Folly Beach, Charleston SC 29401, in support of VISN 7 VA Health Care System at the Atlanta VA Medical Center located at 1670 Clairmont Road Decatur, GA 30033.

The purchase request ID for this requirement is 508-25-3-144-0001.

(2) Description of Action: This acquisition is conducted under the authority of the Multiple-Award Schedule Program ([41 U.S.C. 152\(3\)](#) and [40 U.S.C. 501](#)).

The Atlanta VA Medical Center requires the award of an Olympus Lease firm fixed price delivery order for a base plus three (3) options years.

Order against: ☒ FSS Contract Number. 36F79721D0168

Name of Proposed Contractor:	Olympus America Inc.
Street Address:	3500 Corporate Parkway P.O. Box 610
City, State, Zip:	Center Valley, PA 18034-0610
Phone:	(484)896-5000

(3) Description of Supplies or Services:

*The Contracting Officer notes that this award is planned as a base and three (3) option years contract. The option to award this contract as a base and four (4) option-year contract was evaluated; however, the new models of the equipment are released in tandem with this schedule. By awarding only a base and three (3) option-years contract, the facility is able to utilize the newest equipment at the current time and provide the best care to the patients of the facility.

The Atlanta VA Health Care System requires the leasing and service agreement for high-definition video systems, light sources, and flexible scopes for minimally invasive procedures in support of its Surgical Services. This will provide ambulatory surgery, outpatient endoscopy and other clinical procedures from interim care. It has been deemed leasing to be the new level of standardization as it presents the VA with the ability to standardize with greater efficiency, flexibility, and the ability to predict future maintenance costs.

Olympus's FSS Contract 36F79721D0168 was established to provide the VA Medical Center with proper equipment and maintenance to serve Veterans without disruption and with the latest best technology on the market at discounted pricing. Olympus America, Inc. is in accordance with VHA Directive 2009-004, VHA Handbook 1761.1, and the April 19, 20210 Deputy Undersecretary for Health Operations and Management (DUSHOM) Memo outlining guidance for VHA standardization of endoscopes, which deems leasing endoscopes to be the new level of standardization.

(4) Identify the Authority and Supporting Rationale (see below and if applicable, a demonstration of the proposed contractor's unique qualifications to provide the required supply or service.

☒ [FAR 8.405-6\(a\)\(1\)\(B\)](#): Only one source is capable of providing the supplies or services required at the level of quality required because the supplies or services are unique or highly specialized.

The leasing and service agreement required for the Atlanta VAMC is for high-definition video systems, light sources, and flexible scopes for minimally invasive procedures in support of its Surgical Services. The lease of this equipment will provide ambulatory surgery, outpatient endoscopy, and other clinical procedures from interim care. It has been deemed leasing to be the new level of standardization as it presents the VA with the ability to standardize with greater efficiency, flexibility, and the ability to predict future maintenance costs.

Additionally, the VHA Procurement and Logistics Office established an Integrated Product Team (IPT) to develop requirements for the national standardization of endoscopes throughout VHA. This IPT has determined that national standardization creates the best value, enhances the safety and quality of patient care, and results in reduced variability in the number of different processes required for endoscope setup, use, and reprocessing, thus reducing the potential for negative patient outcomes and errors. In accordance with VA Deputy Under Secretary for Health for Operations and Management Memo dated December 21, 2012, "Facilities are expected to standardize endoscopes inventories to one vendor through the use of national leasing contract".

(5) Describe Why You Believe the Order Represents the Best Value consistent with FAR 8.404(d) to aid the contracting officer in making this best value determination:

GSA has already determined the prices of supplies under schedule contracts to be fair and reasonable. Considering the price, special features, and the reduced administrative costs of placing a delivery order over writing an open market contract, the CO has determined that the price offered under Olympus's FSS contract represents the best value to the government.

(6) Describe the Market Research Conducted among schedule holders and the results or a statement of the reason market research was not conducted.

Market Research was conducted and with this being a VHA National Standardization requirement from VHA Directive 2009-004 Handbook 1761(2) and services having been provided by Olympus America, Inc., contact was made with the provider (Olympus America, Inc.) to determine if there were any distributors that could provide this service. It was determined that there are currently no distributors that can provide the Olympus Lease requirement.

(7) Any Other Facts Supporting the Justification:

The requested Olympus scopes and equipment are the ones that are compatible and will work with the station's existing equipment.

Additionally, medical staff has already been trained and compiled hundreds of hours of experience using this equipment through the years of prior contracts. The VHA has established policies to standardize and lease endoscopes rather than purchase them. The VHA Procurement and Logistics Office established an Integrated Product Team (IPT) to develop requirements for the national standardization of endoscopes throughout VHA. This IPT has determined that national standardization creates the best value, enhances the safety and quality of patient care, and results in reduced variability in the number of different processes required for endoscope setup, use, and reprocessing, thus reducing the potential for negative patient outcomes and errors. In accordance with VA Deputy Under Secretary for Health for Operations and Management Memo, dated December 21, 2012, "Facilities are expected to standardize endoscopes inventories to one vendor through the use of national leasing contract".

(8) A Statement of the Actions, if any, the agency may take to remove or overcome any barriers that led to the restricted consideration before any subsequent acquisition for the supplies or services is made:

In the government's best interest, the Agency will continue to seek additional competition as Olympus adds authorized distributors to their company. During the duration of the contract, when option years are exercised, a market survey is conducted to monitor the contract. This monitoring will determine if the specific brand equipment/service is still within the government's best interest and if not, a new solicitation may need to be issued for procurement.

(9) Requirements Certification: I certify that the requirement outlined in this justification is a Bona Fide Need of the Department of Veterans Affairs and that the supporting data under my cognizance, which are included in the justification, are accurate and complete to the best of my knowledge. I understand that processing of this limited sources justification restricts consideration of Federal Supply Schedule contractors to fewer than the number required by FAR Subpart 8.4.
