Section B: Description of the Supplies/Services Required

Twenty-five FLIR Research IR USB dongles reprogrammed by the OEM to include Research Studio Perpetual Licenses.

Section C: Justification for Soliciting from a Single Source or Brand Name

The FLIR Research IR USB dongles must be reprogrammed by the OEM. The required software license is specific to FLIR software systems. Other manufacturer's systems would require additional or specialized modifications to existing camera and computer infrastructure resulting in schedule delays and integration cost that could not reasonably be expected to be recovered through competition. Due to compatibility with existing camera, computer, peripherals, and training infrastructure, FLIR is the only manufacturer capable of reprogramming the FLIR Research IR USB dongles.

Section D: Efforts to Obtain Competition

These FLIR Research IR dongles must be reprogrammed by the OEM. The required licenses are specific to the OEM's camera software systems and must be programmed by the OEM.

Section E: Steps to Preclude Future Single Source or Brand Name Awards

This office will continue monitoring the industry through Internet research, trade journals, technical symposia, and contact with industry representatives should a future need arise. Any future requirements will be researched thoroughly. If a product meeting the technical requirements is identified, a competitive acquisition for the requirement will definitely be considered.

Section F: Contracting Officer's Determination

I have determined, in accordance with [FAR 13.106-1\(b\)\(1\)](#), that the circumstances of this contract action deem only a single source is reasonably available.
